Every day we make decisions: about the things that we buy or the meals we eat; about the investments we make or our children's health and education; even the causes that we champion or the planet itself. Unfortunately, we often choose poorly. We are all susceptible to biases that can lead us to make bad decisions that make us poorer, less healthy and less happy. And, as Thaler and Sunstein show, no choice is ever presented to us in a neutral way. By knowing how people think, we can make it easier for them to choose what is best for them, their families and society. Using dozens of eye-opening examples the authors demonstrate how to nudge us in the right directions, without restricting our freedom of choice. Nudge offers a unique new way of looking at the world for individuals and governments alike. This is one of the most engaging, provocative and important books you will ever read.

Often by the time clients enter a therapist ' s office they have been told what to do—often soundly and sensibly—by well-meaning family, friends, and health professionals. The challenge for the effective therapist is how to communicate these same, sound messages in ways that the client is more likely to take on board, act on, and benefit from. 101 Stories for Enhancing Happiness and Well-Being harnesses the power of stories to translate the research from positive psychology into effective and practical therapeutic interventions. ## How to Become a Millionaire!

Buddhism points out that emphasizing individuality and promoting the greatest fulfillment of the desires of the individual jointly lead to destruction. The book promotes the basic value-choices of Buddhism, namely happiness, peace and permanence. Happiness research convincingly shows that not material wealth but the richness of personal relationships determines happiness. Not things, but people make people happy. Western economics tries to provide people with happiness by supplying enormous quantities of things and today 's dominating business models are based on and cultivates narrow self-centeredness. But what people need are caring relationships and generosity. Buddhist economics makes these values accessible by direct provision. Peace can be achieved in nonviolent ways. Wanting less can substantially contribute to this endeavor and make it happen more easily. Permanence, or ecological sustainability, requires a drastic cutback in the present level of consumption and production globally. This reduction should not be an inconvenient exercise of self-sacrifice. In the noble ethos of reducing suffering it can be a positive development path for humanity.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied

### How Will You Measure Your Life? (Harvard Business Review Classics)

"Happy City is not only readable but stimulating. It raises issues most of us have avoided for too long. Do we live in neighbourhoods that make us happy? That is not a silly question. Montgomery encourages us to ask it without embarrassment, and to think intelligently about the answer." --The New York Times More of us than ever are moving to inner cities, mixed-use suburbs, and densely constructed towns. Our surroundings have certainly changed--but is city living cheering us up, or are we as gloomy on our walks to the subway as we were on our long predawn commutes? And if that's the case, how can we turn things around? In breezy, vivid prose, Montgomery reports from such exciting and dysfunctional places as Bogotá, once a dangerous, car-obsessed city, now a bike-loving model of civic excellence; California's San Joaquin Valley in the apocalyptic aftermath of the housing crisis; and a suburb of Vancouver, where a power company gathers energy from sewage to provide its citizens with heat and hot water. Full of cutting-edge insights from behavioral economists and leading urban thinkers, Happy City offers a completely new way to examine city life, showing us how small innovations can radically improve our experiences. Practical, genial, and fiercely open-minded, Montgomery has written a brilliant book about what today's cities are getting right--and how tomorrow's cities
