Coaching Skills for On-the-job Trainers

Capturing the tough, no-holds-barred stories told by Mike Ditka's drinking buddies, combative players, loyal teammates, friends, and fans, this unique tell-all shows "Da Coach" through the eyes of the people closest to him. Raucous and amusing, this biography proves that Ditka's no-nonsense attitude and give-'em-hell demeanor on the playing field was certainly no act. Gale Sayers, Dick Butkus, and Walt Garrison remember going shoulder to shoulder on the gridiron with the monster of the midway himself. Jim McMahon, Mike Singletary, and Thomas "Hollywood" Henderson share incredible stories of Ditka's intense sideline strategizing, skirmishes, and

scuffles. Tom Landry, Dave McGinnis, and Bob Costas recount Ditka's early years as a renegade roughouser, and his incredible success as the man in charge of the World Champion Chicago Bears. "Da Coach" celebrates the life and colorful times of a true sports original who has it all--guts, glory, and personality to spare.

Tom Bandy has come to be known as one of today's most insightful interpreters of congregational life and the cultural changes that are affecting it. In previous books he has addressed issues such as the addictive behaviors congregations exhibit, the cultural situation that makes this a "pre-Christian" era, and the organizational changes that must occur if bold new congregational systems are truly to work. By evaluating the responses to all of these concerns, the author has heard a recurring set of questions: How do I help people overcome the fear of change? How do I persuade them to accept the cost? Why is there a sense that change is inherently unfaithful? When I go to my church next Sunday and drink coffee with that little group of people God has gathered in our place, how in the world do I convince them to take such risks? Drawing on the penetrating analysis of contemporary cultural shifts that has come to be his trademark, Bandy offers detailed and pragmatic suggestions for how one can invite established church members into the mission of transforming their congregation into a place that calls and equips people to be disciples of Jesus Christ.

Climate change is one of the most pressing challenges facing the world today. And increasingly, it's become a crucial business issue. How will you and your company respond? In *Climate Change: What's Your Business Strategy?* Andrew Hoffman and John Woody provide concise and reliable advice to help you answer this question. Drawing from their extensive experience working with organizations to address issues of environmental sustainability, the authors explain the impact of climate change on businesses and present a three-step process for developing an effective climate-change strategy:

- Determine your company's "carbon footprint" and the ways in which potential changes in policy and markets will affect how you position your products and services.
- Reduce your carbon footprint in ways that create new strategic advantages.
- Gain a seat at the policy-development table so you can begin influencing policy decisions that will affect your company.

Packed with cogent

advice and examples of how organizations in a wide range of industries are adopting this process, Climate Change is your playbook for strategically addressing a complex problem that no company can afford to ignore. From our Memo to the CEO series -- solutions-focused advice from today's leading practitioners.

The Power of Self-Coaching

In this inspirational yet practical book, the man Parade called “the most important coach in America,” subject of the national bestseller *Season of Life*, Joe Ehrmann, describes his coaching philosophy and explains how sports can transform lives at every level of play, from the earliest years to professional sports. Coaches have a tremendous platform, says Joe Ehrmann, a former Syracuse University All-American and NFL star. Perhaps second only to parents, coaches can impact young people as no one else can. But

most coaches fail to do the teaching, mentoring, even life-saving intervention that their platform provides. Too many are transactional coaches; they focus solely on winning and meeting their personal needs. Some coaches, however, use their platform. They teach the Xs and Os, but also teach the Ys of life. They help young people grow into responsible adults; they leave a lasting legacy. These are the transformational coaches. These coaches change lives, and they also change society by helping to develop healthy men and women. InSideOut Coaching explains how to become a transformational coach. Coaches first have to “go inside” and articulate their reasons for coaching. Only those who have taken the InSideOut journey can become transformational. Joe Ehrmann provides examples of coaches in his life who took this journey and taught him how to find something bigger than himself in sports. He describes his own InSideOut experience, starting with the death of his beloved brother, which helped him understand how sports could transcend the playing field. He gives coaches the information and the tools they need to become transformational. Joe Ehrmann has taken his message about the extraordinary power of sports all over the country. It has been warmly endorsed by NFL head coaches, athletic directors at major universities, high school head coaches, even business groups and community organizations. Now any parent-coach or school or community coach can read Ehrmann’s message and learn how to make sports a life-changing experience.

Winds of Change

"A good coach can change a game. A great coach can change a life." John Wooden The words of legendary UCLA basketball coach John Wooden are as true today as when he first spoke them. Modern coaches have difficult jobs and dual roles. They are not only expected to get results on the scoreboard, but they must

simultaneously recognize the outsized role they have in shaping the lives of those they lead. And they must do all of this while navigating a complex and changing landscape. GAME TIME provides a light along that leadership journey. Each devotional entry features wisdom from some of history's greatest coaches and leaders, inspirational words to encourage the reader, and the timeless truth of the Bible to spur reflection, prayer, and growth. Every leader has the opportunity to change a game. The greatest leader's use the game to change lives.

Coaching: Women's Athletics

Coaching is an essential skill for leaders. But for most busy, overworked managers, coaching employees is done badly, or not at all. They're just too busy, and it's too hard to change. But what if managers could coach their people in 10 minutes or less? In Michael Bungay Stanier's *The Coaching Habit*, coaching becomes a regular, informal part of your day so managers and their teams can work less hard and have more impact. Coaching is an art and it's far easier said than done. It takes courage to ask a question rather than offer up advice, provide an answer, or unleash a solution. Giving another person the opportunity to find their own way, make their own mistakes, and create their own wisdom is both brave and vulnerable. It can also mean unlearning our "fix it" habits. In this practical and inspiring book, Michael shares seven transformative questions that can make a difference in how we lead and support. And, he guides us through the tricky part - how to take this new information and turn it into habits and a daily practice. -Brené Brown, author of *Rising Strong* and *Daring Greatly* Drawing on years of experience training more than 10,000 busy managers from around the globe in practical, everyday coaching skills, Bungay Stanier reveals how to unlock your peoples' potential. He unpacks seven essential coaching questions to demonstrate how---by saying

less and asking more--you can develop coaching methods that produce great results. - Get straight to the point in any conversation with The Kickstart Question - Stay on track during any interaction with The AWE Question - Save hours of time for yourself with The Lazy Question, and hours of time for others with The Strategic Question - Get to the heart of any interpersonal or external challenge with The Focus Question and The Foundation Question - Finally, ensure others find your coaching as beneficial as you do with The Learning Question A fresh, innovative take on the traditional how-to manual, the book combines insider information with research based in neuroscience and behavioural economics, together with interactive training tools to turn practical advice into practiced habits. Dynamic question-and-answer sections help identify old habits and kick-start new behaviour, making sure you get the most out of all seven chapters. Witty and conversational, The Coaching Habit takes your work--and your workplace--from good to great.

Da Coach

"The Ultimate Therapy addresses the question: will stem cells bring about new, effective therapies for brain disorders? Stem cell therapies are the subject of enormous hype. The International Society for Stem Cell Research notes the 'near magical hold' that stem cell therapies have over patients' imaginations. This is not healthy. The intention with this book is to try to introduce some realism into this discussion. Certainly, stem cell therapies have real therapeutic promise, but it is important that patients, doctors, ethicists, regulators, and the public at large understand their potential and their limitations. Stem cell therapies have failed in the past. We need to understand why, and learn for the future. The therapies offered by unlicensed clinics are not the same as those going forward into proper regulated trials. We all need to

understand the difference, and why it matters. Regenerative medicine for the brain-were it to emerge-would be the ultimate therapy. Brain diseases are more than just killers. Parkinson's disease, Alzheimer's disease, and stroke steal our capacity for thought, emotion, and social interaction. They destroy human faculties to a far greater degree even than disorders such as cancer. Further, repairing brain tissue is the ultimate biomedical challenge. The human brain is the most complex structure in the known universe, a structure we still barely understand. To be able to rebuild it once damaged is surely the ultimate prize for biomedical science. It is also the ultimate ethical challenge. We can rebuild joints, reconstitute blood, and regenerate liver with barely a thought for ethical concerns. But the prospect for brain repair stirs atavistic fears. Will I be the same person with new brain cells in my head? Stem cells offer the prospect for bringing this ultimate therapy to life, in a way that could be envisaged for no other therapeutic vehicle. Repairing brain with stem cells: truly the Ultimate Therapy"--

Why is The Healthiest You different from every other health, diet, and fitness plan? Because it works. Dr. Kelly Traver understands that the human brain resists change. Only when we learn the secrets of how to get our brain to work for us, not against us, can we make healthy, permanent lifestyle changes. By combining recent cutting-edge discoveries in neuroscience with the latest information in medicine, nutrition, and fitness, Dr. Traver developed the Healthiest You program and initially tested it on her patients, ranging in age from twenty to eighty-one. Her results were astounding:

- Among those who were overweight, the average weight loss was 19 pounds.
- Among those who were diabetic, 80 percent achieved a reduction in their blood sugar.
- Among those with high blood pressure, 87 percent returned their blood pressure to normal.
- Some 80 percent of the smokers successfully kicked the habit.

In the course of 12 short weeks, readers can achieve similar success by following Dr. Traver's simple, straightforward instructions to work with this stubbornly change-resistant organ so that it not only accepts new,

healthy lifestyle habits, it actually embraces them. You can use this empowering information to remotivate yourself whenever your enthusiasm starts to wane. With the powerful tools provided by The Healthiest You, you can learn to change your body and your life, simply by understanding and working with your brain.

The Future of Brain Repair - a Realist`s Guide to Stem Cell Therapy

You're trying to help--but is it working? Helping others is a good thing. Often, as a leader, manager, doctor, teacher, or coach, it's central to your job. But even the most well-intentioned efforts to help others can be undermined by a simple truth: We almost always focus on trying to "fix" people, correcting problems or filling the gaps between where they are and where we think they should be. Unfortunately, this doesn't work well, if at all, to inspire sustained learning or positive change. There's a better way. In this powerful, practical book, emotional intelligence expert Richard Boyatzis and Weatherhead School of Management colleagues Melvin Smith and Ellen Van Oosten present a clear and hopeful message. The way to help someone learn and change, they say, cannot be focused primarily on fixing problems, but instead must connect to that person's positive vision of themselves or an inspiring dream or goal they've long held. This is what great coaches do--they know that people draw energy from their visions and dreams, and that same energy sustains their efforts to change, even through difficult times. In contrast, problem-centered approaches trigger physiological responses that make a person defensive and less open to new ideas. The authors use rich and moving real-life stories, as well as decades of original research, to show how this distinctively positive mode of coaching—what they call "coaching with compassion"--opens people up to thinking creatively and helps them to learn and grow in meaningful and sustainable ways. Filled with probing questions and

exercises that encourage self-reflection, Helping People Change
will forever alter the way all of us think about and practice what we
do when we try to help.

The Practice of Professional Consulting

The Practice of Professional Coaching Change is the life-blood of consulting just as organizations endure only through successful change. The reality of this mutual need lies at the heart of what consulting is all about. Consultants solve problems created by the powerful forces of change in an organization's environment and in so doing, create change themselves. The Practice of Professional Consulting is a comprehensive examination of what has been called "the world's newest profession." In this practical resource Edward Verlander offers an overview of the industry and includes the most useful processes, tools, and skills used by successful consultants to produce solutions for their clients. The book also reveals why consulting is a growing and attractive career option. The best practices used by leading consulting firms are included in the book as well as the capabilities skillful consultant use in each stage of engagement. Verlander also recommends ways to ensure a consultant can solve a client's problems in a systematic, professional way. At the very heart of the book is the emphasis he puts on what is needed to become a truly trusted consultant. Filled with a wealth of must-have information from a wide range of consulting professionals, the book includes: a model of the consulting cycle; a diagnostic instrument for assessing consulting roles; ideas of how to develop political intelligence to navigate client organizations; tools for managing consulting meetings, risk assessment, and skills transfer; techniques in communications, emotional intelligence, presentations, and listening; and much more. Written for anyone wishing to start a consulting business, new employees at established consulting firms, facilitators of consulting training programs, and

faculty at business schools, this important resource provides an easy way to understand the stages, roles, and tasks of consulting found in any type of consulting and it provides simple and easy-to-use techniques and templates for implementation.
