Advanced Media Arabic

An invaluable text in language and linguistics because it has a unique scope: a one-volume description of the Spanish language and its differences from English, and ranges from pronunciation and grammar to word meaning, language use, and social and dialectical variation. Designed for survey courses in Spanish linguistics with technical concepts explained in context for beginners in the field, Spanish/English Contrasts brings out the ways in which insights into the two languages have evolved as scholars have built on the work and research of others in the field. A bilingual glossary of linguistic terms is provided to facilitate discussion in either language. This second edition is thoroughly updated to incorporate insights and issues that have come to the fore from the explosion of research in the past twenty-five years in all of the areas covered by the book. It includes an expanded bibliography and index, and adds new exercises for student application and class discussion. Its approach remains broadly based however, in order to accommodate a range of areas and data rather than focusing narrowly on one single theory or research area, and it continues to emphasize implications for language teaching, translation, and other practical applications.

The TKT Course CLIL Module

Arabic is a diglossic language: What is written is different from what is spoken. For decades, students have learned written Arabic first and then spoken but this does not reflect the sociolinguistic reality of the language nor does it give students what they need to communicate. Teachers of Arabic have struggled to teach communicative skills. With the introduction of Al-Kitaab Third Edition, this method had to be established. Though there has been much discussion about "integrating Arabic," little research or evidence has been presented about it. In this volume, Al-Batal gathers scholars who are using this method with success to present research that the method works. They will address curricular models, students' measured outcomes (with copious examples), and attitudes of students and teachers (which often change) using this methodology. Contributors are a mix of well-known and young scholars, bringing fresh voices into this discussion and making this method more established and less "experimental." Additional data will be provided on the GU Press website. Data include, tables/figures, audio, and video recordings of students showing the proposed method

and outcomes from the method discussed. References to these resources will be made in the book.

How do you build successful professional connections with colleagues from Mexico? While most books focus simply on how to avoid common communication mistakes, this book leads its readers to an understanding of how to succeed and thrive within the three cultures, Mexico, the US, and Canada. Kelm, Hernandez-Pozas and Victor present a set of practical guidelines for communicating professionally with Mexicans, both in Mexico and abroad, providing many photographs as examples. The Seven Keys to Communicating in Mexico follows the model of presenting key cultural concepts used in the earlier books by Kelm and Victor on Brazil and (with Haru Yamada) on Japan. Olivia Hernandez-Pozas, Orlando Kelm, and David Victor, well-respected research professors and seasoned cross-cultural trainers for businesspeople, guide readers through Mexican culture using Victor's LESCANT Model (an acronym representing seven key cross-cultural communication areas: Language, Environment, Social Organization, Contexting, Authority, Nonverbal Behavior, and Time). Each chapter addresses one of these topics and demonstrates how to evaluate the differences among Mexican, US, and Canadian cultures. In the final chapter the authors bring all of these cultural interactions together with a sample case study about business interactions between Mexicans and North Americans. The case study includes additional observations from North American and Mexican business professionals who offer related suggestions and recommendations.
