What Would the World Be Without Black People?

"In Superior award-winning science writer Angela Saini explores the concept of race, past and present. She examines the dark roots of race research and how race has again crept gently back into science and medicine. And she investigates the people who use this research for their own political purposes, including white supremacists. They believe that populations are born different, in character and intellectually, and that this defines the success or failure of nations. It is a worldwide network of eugenicists with their own journals journals and sources of funding, providing the kind of shoddy studies that were ultimately cited in Richard Hernstein's and Charles Murray's 1994 title, The Bell Curve, which purported to show differences in intelligence among races. Taking us from Darwin through the civil rights movement to modern-day ancestry testing, Saini examines how deeply our present is influenced by our past, and the role that politics has so often had to play in our understanding of race. Superior is a powerful, rigorous, much needed examination of the insidious history and damaging consequences of race science and the unfortunate reasons behind its apparent recent resurgence across the globe"--

How to Be an Antiracist

For much of America's history, African Americans were discouraged or aggressively prevented from becoming scientists and engineers. Those who did enter STEM fields found that their inventions and discoveries were often neither recognized nor valued. Even today, particularly in the field of engineering, the participation of African American men and women is shockingly low, and some evidence indicates that the situation might be getting worse. In Changing the Face of Engineering, twenty-four eminent scholars address the underrepresentation of African Americans in engineering from a wide variety of disciplinary and professional perspectives while proposing workable classroom solutions and public policy initiatives. They combine robust statistical analyses with personal narratives of African American engineers and STEM instructors who, by taking evidenced-based approaches, have found success in

graduating African American engineers. *Changing the Face of Engineering* argues that the continued underrepresentation of African Americans in engineering impairs the ability of the United States to compete successfully in the global marketplace. This volume will be of interest to STEM scholars and students, as well as policymakers, corporations, and higher education institutions.

A World Without Black People

For use in schools and libraries only. Offers brief biographies of African American educators, entertainers, inventors, authors, athletes, and others who have made important contributions to American life.

When the World was Black Part Two

The Book of Negroes

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Delve into what it was like to live during the eighteenth century by reading the first-hand accounts of everyday people, including city dwellers and farmers, businessmen and bankers, artisans and merchants, artists and their patrons, politicians and their constituents. Original texts make the American, French, and Industrial revolutions vividly contemporary. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to insure edition identification: ++++ Library of Congress N004707 Signed at the end: Absalom Jones, Richard Allen. The Invention of the Jewish People

Who invented God? When, why, and where? Thomas Römer seeks to answer these enigmatic questions about the deity of the great monotheisms—Yhwh, God, or Allah—by tracing Israelite beliefs and their context from the Bronze Age to the end of the Old Testament period in the third century BCE, in a masterpiece of detective work and exposition.

Black Man on the Titanic

My name is David LG Wilson. I was born on the Island of Grenada. I traveled through out the Caribbean, and I came in the United State in Boston in 1976.

Black History for Beginners

Louisa, a young chambermaid at the Hotel New Yorker, forms an unlikely friendship--based on a mutual fascination with pigeons--with the hotel's most famous resident, eccentric and pioneering inventor Nikola Tesla, during his final days.

The Invention of Everything Else

The true story of one of the black passengers on the Titanic, for history readers and fans of Hidden Figures and The Immortal Life of Henrietta Lacks. Joseph Laroche was an anomaly among the passengers of the Titanic. He was exceptionally well-educated in a time when few black men had access to an education?and when even fewer were able to travel on a luxurious ship in first or second class. So, who was Joseph Laroche? And where was he going? This biography recounts the life of Joseph Laroche, his part in the history of Haiti, and how he, as a 24-year-old father of two (soon to be three) children, ended up on the last ship of that era of glamorous travel. He was a direct descendant of the father of Haitian independence and related to two Haitian presidents. As an engineer, Laroche contributed to the construction of the Parisian railway and had a promising future ahead of him. Ivorian-French writer Serge Bilé offers a fresh perspective on the tragedy that still fascinates millions and has inspired dozens of books and films. With thorough research in Haiti and France, Bilé unearths the story of the intriguing figure of Joseph Laroche. This is an account of multi-cultural black history and of the political and natural forces that converged on one man. Praise for Black Man on the Titanic “A revelation.”—Mitchell Kaplan, founder of Books & Books “An absorbing and rewarding read.”—Leonard Carpenter, author of Lusitania Lost and Conan the Savage

The Mis-education of the Negro

Traces the lives of fourteen black scientists and inventors who have made significant contributions in the various fields of science and industry. Reprint.

African-American Inventions That Changed the World the World

Where Would The World Be Without Black People explores life without the contributions of African Americans. In the book, Timothy, the main character wishes that Black people did not exist and spends a weekend without the contributions of Black people which alters his life dramatically. The book features many prominent Black people and how they have impacted society today.

The Invention of God

Reprint. Contains material originally published by Victor H. Green in 1938, 1947, 1954, and 1963.

Intelligence, Genes, and Success

100 African-Americans Who Shaped American History

Black Like Me Teacher Guide

This comprehensive and entertaining account of African-American history is presented in a fun, engaging, and intelligent way. Significant information in six broad sections includes Great Migrations; Civil Rights and Politics; Science, Inventions, and Medicine; Sports; Military; Culture and Religion.

The Invention of the White Race, Volume 2: The Origin of Racial Oppression in Anglo-America (Second Edition)

Examines the lives of African American women who have offered important contributions or inventions in the field of science, including Madame C.J. Walker, Angela D. Ferguson, Bessie Blount Griffin, and Shirley Ann Jackson.

Black Stars

A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy. Looting -- a crowd of people publicly, openly, and directly seizing goods -- is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class -- not to mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black, anti-Indigenous oppression. From slave revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. In *Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

When We Ruled

A scientific response to the best-selling *The Bell Curve* which set off a hailstorm of controversy upon its publication in 1994. Much of the public reaction to the book was polemic and failed to analyse the details of the science and validity of the statistical arguments underlying the book's conclusion. Here, at last, social scientists and statisticians reply to *The Bell Curve* and its conclusions about IQ, genetics and social outcomes.

African American Inventors

Woodson's classic work of criticism explores how the education received by blacks has failed to give them an appreciation of themselves as a race and their contributions to history. Woodson puts forward a program that calls for the educated to learn about their past and serve the black community. (Education/Teaching)

A Narrative of the Proceedings of the Black People, During the Late Awful Calamity in Philadelphia, in the Year, 1793

Black Firsts

Warrior. Samurai. Legend. When Yasuke arrived in Japan in the late 1500s, he had already traversed much of the known world. Kidnapped as a child in Northeast Africa, he served as a bodyguard to the head of the Jesuits in Asia, traveling to India and China, and eventually arriving in Japan, where everything would change. Most Japanese people had never seen an African man before. Some believed he was a god. Others saw him as the black-skinned Buddha. Among those drawn to him was Lord Nobunaga, head of the most powerful clan in Japan, who made Yasuke a samurai in his court. Soon, Yasuke was learning the traditions of martial arts and ascending the upper echelons of Japanese society, where he would live on to become a legend for the centuries to come.

BLACK BOOK

"Anyone interested in understanding the contemporary Middle East should read this book." Tony Judt --

1001 Things Everyone Should Know about African American History

Who invented the traffic light? What about transportation itself? Farming? Art? Modern chemistry? Who made...cats? What if I told you there was ONE answer to all of these questions? That one answer? BLACK PEOPLE! Seriously. And this book is like a mini-encyclopedia, full of more evidence than WikiLeaks and just as eye-opening! Do you know just how much Black inventors and creators have given to modern society? Within the past 200 years, Black Americans have drawn on a timeless well of inner genius to innovate and engineer the design of the world we live in today. But what of all the Black history before then? Before white people invented the Patent Office, Black folks were the original creators and builders, developing ingenious ways to manage the world's changes over millions of years, everywhere you can imagine, from Azerbaijan to Zagazig! With wit and wisdom (and tons of pictures!)

this book digs deeper than the whitewashed history we learn in school books and explores how our African ancestors established the foundation of modern society! Have you inherited this genius? What can you do with it? Inspired by solutions from the past, we can develop strategies for a successful future!

Black Pioneers of Science and Invention

Winner, Kirkus Prize for Non-Fiction, 2015 In the 150 years since the end of the Civil War and the ratification of the Thirteenth Amendment, the story of race and America has remained a brutally simple one, written on flesh: it is the story of the black body, exploited to create the country's foundational wealth, violently segregated to unite a nation after a civil war, and, today, still disproportionately threatened, locked up and killed in the streets. What is it like to inhabit a black body and find a way to live within it? And how can America reckon with its fraught racial history? *Between the World and Me* is Ta-Nehisi Coates' attempt to answer those questions, presented in the form of a letter to his adolescent son. Coates shares with his son the story of his own awakening to the truth about history and race through a series of revelatory experiences: immersion in nationalist mythology as a child; engagement with history, poetry and love at Howard University; travels to Civil War battlefields and the South Side of Chicago; a journey to France that reorients his sense of the world; and pilgrimages to the homes of mothers whose children's lives have been taken as American plunder. Taken together, these stories map a winding path towards a kind of liberation—a journey from fear and confusion, to a full and honest understanding of the world as it is. Masterfully woven from lyrical personal narrative, reimaged history, and fresh, emotionally charged reportage, *Between the World and Me* offers a powerful new framework for understanding America's history and current crisis, and a transcendent vision for a way forward. Ta-Nehisi Coates is a national correspondent for the Atlantic and the author of the memoir *The Beautiful Struggle*. Coates has received the National Magazine Award, the Hillman Prize for Opinion and Analysis Journalism, and the George Polk Award for his Atlantic cover story 'The Case for Reparations'. He lives in New York with his wife and son. 'Coates offers this eloquent memoir as a letter to his teenage son, bearing witness to his own experiences and conveying passionate hopes for his son's life this moving, potent testament might have been titled *Black Lives Matter*.' Kirkus Reviews 'I've been wondering who might fill the intellectual void that plagued me after James Baldwin died. Clearly it is Ta-Nehisi Coates. The language of *Between the World and Me*, like Coates' journey, is visceral, eloquent and beautifully redemptive. And its examination of the hazards and hopes of black male life is as profound as it is revelatory. This is required reading.' Toni Morrison 'Extraordinary Ta-Nehisi Coates writes an impassioned letter to his teenage son—a letter both loving and full of a parent's dread—counselling him on the history of American violence against the black body, the young African-American's extreme vulnerability to wrongful arrest, police violence, and disproportionate incarceration.' David Remnick, *New Yorker* 'A searing meditation on what it means to be black in America today as compelling a portrait of a father-son relationship as Martin Amis's *Experience* or Geoffrey Wolff's *The Duke of Deception*.' *New York Times* 'Coates possesses a profoundly empathetic imagination and a tough intellect Coates speaks to America, but Australia has reason to listen.' *Monthly* 'Heartbreaking, confronting, it draws power from understatement in dealing with race in America and the endless wrong-headed concept that whites are somehow entitled to subjugate everyone else.' *Capital* 'In our current global landscape it's an essential perspective, regardless of your standpoint.' *Paperboy*

The Negro Motorist Green Book Compendium

Examines cultural analogies between Native Americans and Africans, offering evidence of the presence of African explorers in the New World centuries

before the arrival of Columbus.

Black God

Did you know that African Americans invented the mop, lawn mower, clock, gas mask, and more? In this fun children's book, the author takes the reader on an alphabet journey while playfully introducing the inventions of African Americans.

Black Heroes

Abducted from her West African village at the age of eleven and sold as a slave in the American South, Aminata Diallo thinks only of freedom - and of finding her way home again. After escaping the plantation, torn from her husband and child, she passes through Manhattan in the chaos of the Revolutionary War, is shipped to Nova Scotia, and then joins a group of freed slaves on a harrowing return odyssey to Africa. Based on a true story, Lawrence Hill's epic novel spans three continents and six decades to bring to life a dark and shameful chapter in our history through the story of one brave and resourceful woman.

How to Invent Everything

Black Inventors, Crafting Over 200 Years of Success, highlights the work of Black inventors from over seventy countries. The author, Keith C. Holmes, has spent more than twenty years researching Black inventors from countries that include Australia, Bahamas, Barbados, Canada, Cuba, Ethiopia, France, Germany, Ghana, Dominican Republic, Guadeloupe, Guyana, Haiti, Italy, Jamaica, Japan, Kenya, Mozambique, Nigeria, St. Vincent, South Africa, Tanzania, Trinidad and Tobago, the United Kingdom and the United States. Without inventions, innovations, financial resources, materials, muscle and labor saving devices, civilizations cannot exist and flourish. This book documents a number of inventions, patents and labor saving devices conceived by Black inventors. Among many other inventions, pre-enslaved Africans, developed agricultural tools, building materials, medicinal herbs, cloth and weapons. Although historical documents emphasize that millions of Black people arrived in Canada, the Caribbean, Central and South America and the United States under slavery's yoke, it is relatively unknown that thousands of Africans and their descendants developed numerous labor-saving devices and inventions that spawned companies which generated money and jobs, worldwide. While most authors focus primarily on American and European inventors, Keith Holmes introduces inventions, both past and present, that Black people, developed and patented globally and multiculturally. Black Inventors, Crafting Over 200 Years of Success, also features early Black inventors from virtually every state in the US. It includes details about the first Black inventor who obtained a patent in both the Caribbean and the United States. To date, seventeen African American men have been inducted into the National Inventors Hall of Fame. Two inventors, Jan E. Matzelliger, (Suriname) and Elijah McCoy, (Colchester, Canada) were not born in this country. The material available in this book, one of the first to address the diversity of black inventors and their inventions from a global perspective, effectively gives the reader, researcher, librarian, student, and teacher the materials they need to understand that the Black inventor is not only a national phenomenon, but also a global giant.

In Defense of Looting

When the World Was Black: The Untold History of the World's First Civilizations (Volume Two of The Science of Self series) has been published in TWO parts. Why two? Because there are far too many stories that remain untold. We had over 200,000 years of Black history to tell – from the southern tip of Chile to the northernmost isles of Europe – and you can't do that justice in a 300-page book. So there are two parts, each consisting of 360 pages of groundbreaking history, digging deep into the story of all the world's original people. Part One covers the Black origins of all the world's oldest cultures and societies, spanning more than 200,000 years of human history. Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20,000 years, up to the time of European contact. Each part has over 100 helpful maps, graphs, and photos, an 8-page full-color insert in the center, and over 300 footnotes and references for further research. “In this book, you'll learn about the history of Black people. I don't mean the history you learned in school, which most likely began with slavery and ended with the Civil Rights Movement. I'm talking about Black history BEFORE that. Long before that. In this book, we'll cover over 200,000 years of Black history. For many of us, that sounds strange. We can't even imagine what the Black past was like before the slave trade, much less imagine that such a history goes back 200,000 years or more.” “Part Two covers history from 20,000 years ago to the point of European contact. This is the time that prehistoric cultures grew into ancient urban civilizations, a transition known to historians as the “Neolithic Revolution.”

Slavery by Another Name

A Pulitzer Prize-winning history of the mistreatment of black Americans. In this 'precise and eloquent work' - as described in its Pulitzer Prize citation - Douglas A. Blackmon brings to light one of the most shameful chapters in American history - an 'Age of Neoslavery' that thrived in the aftermath of the Civil War through the dawn of World War II. Using a vast record of original documents and personal narratives, Blackmon unearths the lost stories of slaves and their descendants who journeyed into freedom after the Emancipation Proclamation and then back into the shadow of involuntary servitude thereafter. By turns moving, sobering and shocking, this unprecedented account reveals these stories, the companies that profited the most from neoslavery, and the insidious legacy of racism that reverberates today.

Black Inventors

BLACK BOOK is just another poetic chapter in the life of Mose Xavier Hardin Jr. I have changed and grown over the years overcoming depression, loneliness and a great deal of pain. I have managed to find love again in my 50s. I have managed to survive countless trials with racism and discrimination. I have managed to survive prostate cancer. I have learned to pick my battles and my friends more carefully. I have learned I still have so much more to say!

Changing the Face of Engineering

Meet the black inventors who lived their dreams--from the early years to modern times Benjamin Banneker Andrew Jackson Beard George E. Carruthers,

Ph.D. George Washington Carver Michael Croslin, Ph.D. David Nelson Crosthwait Jr. Charles Richard Drew, M.D. Meredith Gourline, Ph.D. Claude Harvard Shirley Ann Jackson, Ph.D. Frederick McKinley Jones Percy Lavon Julian, Ph.D. Ernest Everett Just, Ph.D. Lewis Howard Latimer Jan Earnst Matzelliger Elijah McCoy Benjamin Montgomery John P. Moon Garrett Augustus Morgan Norbert Rillieux Earl D. Shaw, Ph.D. Madame C. J. Walker Daniel Hale Williams, M.D. Granville T. Woods Jane Cooke Wright, M.D. For more than three centuries, African American inventors have been coming up with ingenious ideas. In fact, it is impossible to really know American history without also learning about the contributions of black discoverers. This collection brings their stories to life. In every era, black inventors have made people's lives safer, more comfortable, more convenient, and more profitable. This inspiring, comprehensive collection shines history's spotlight on these courageous inventors and discoverers. One by one, they persevered, despite prejudice and obstacles to education and training. These stories show you how: Benjamin Montgomery, born a slave, invented a propeller that improved steamboat navigation. Jan Earnst Matzelliger, the son of a Dutch engineer, invented a machine that revolutionized the shoe manufacturing industry. Madame C. J. Walker, born two years after the Civil War emancipated her parents, invented a product that helped make her a millionaire. Dr. George E. Carruthers, an astrophysicist, invented the lunar surface ultraviolet camera/spectrograph for Apollo 16. Dr. Jane Cooke Wright, a third-generation physician and pioneer in the field of cancer research discovered a method for testing which drugs to use to fight specific cancers. Dr. Wright became the first woman elected president of the New York Cancer Society and the first African American woman to serve as dean of a medical college. This outstanding collection brings to light these and dozens of other exciting and surprising tales of inventors and discoverers who lived their dreams.

African American Inventors and Their Inventions A-Z

When the World Was Black: The Untold History of the World's First Civilizations (Volume Two of The Science of Self series) has been published in TWO parts. Why two? Because there are far too many stories that remain untold. We had over 200,000 years of Black history to tell – from the southern tip of Chile to the northernmost isles of Europe – and you can't do that justice in a 300-page book. So there are two parts, each consisting of 360 pages of groundbreaking history, digging deep into the story of all the world's original people. Part One covers the Black origins of all the world's oldest cultures and societies, spanning more than 200,000 years of human history. Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20,000 years, up to the time of European contact. Each part has over 100 helpful maps, graphs, and photos, an 8-page full-color insert in the center, and over 300 footnotes and references for further research. "In this book, you'll learn about the history of Black people. I don't mean the history you learned in school, which most likely began with slavery and ended with the Civil Rights Movement. I'm talking about Black history BEFORE that. Long before that. In this book, we'll cover over 200,000 years of Black history. For many of us, that sounds strange. We can't even imagine what the Black past was like before the slave trade, much less imagine that such a history goes back 200,000 years or more." "Part Two covers history from 20,000 years ago to the point of European contact. This is the time that prehistoric cultures grew into ancient urban civilizations, a transition known to historians as the "Neolithic Revolution."

African Samurai

Celebrates the lives and accomplishments of 150 African Americans who have made a lasting and profound impact on American culture, including Marian

Anderson, Shirley Chisholm, Medgar Evers, Langston Hughes, and Alex Haley.

Black Inventors

A considerable amount of the world's most influential inventors have been African-American, which is a fact that is often overlooked. Throughout history, African-Americans inventors have played a pivotal role in creating revolutionary inventions that has impacted our lives in various ways. These pioneers have contributed to the fields of medicine, agriculture, science and technology, to name a few. In the 1800's, many of these innovators were born into slavery and were not allowed to acquire a formal education, they were faced with countless obstacles and had to triumph over many adverse conditions. Nevertheless, these inventors have made significant contributions to the World. African-American men and women have left their mark in both American and World History. Many of their innovative creations would not exist today if it wasn't for their brilliant minds and creative ideas. The incredible inventors mentioned in this book have collectively created over 500 inventions. They represent some of the amazing men and women who have impacted our lives through their intelligence and ingenuity.

They Came Before Columbus

Misunderstandings between blacks and whites in today's society tend to stem from the misconceptions about blacks that have been allowed to thrive throughout the ages. A powerful way to abolish stereotypes is to present a more complete picture of their past. Black History for Beginners covers a rich but often ignored history and chronicles the black struggle from capture and enslavement in Africa through the Civil Rights movement and up to the present day.

When the World Was Black Part One

#1 NEW YORK TIMES BESTSELLER • From the National Book Award–winning author of *Stamped from the Beginning* comes a “groundbreaking” (Time) approach to understanding and uprooting racism and inequality in our society—and in ourselves. “The most courageous book to date on the problem of race in the Western mind.”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Time • NPR • The Washington Post • Shelf Awareness • Library Journal • Publishers Weekly • Kirkus Reviews *Antiracism* is a transformative concept that reorients and reenergizes the conversation about racism—and, even more fundamentally, points us toward liberating new ways of thinking about ourselves and each other. At its core, racism is a powerful system that creates false hierarchies of human value; its warped logic extends beyond race, from the way we regard people of different ethnicities or skin colors to the way we treat people of different sexes, gender identities, and body types. Racism intersects with class and culture and geography and even changes the way we see and value ourselves. In *How to Be an Antiracist*, Kendi takes readers through a widening circle of antiracist ideas—from the most basic concepts to visionary possibilities—that will help readers see all forms of racism clearly, understand their poisonous consequences, and work to oppose them in our systems and in ourselves. Kendi weaves an electrifying combination of ethics, history, law, and science with his own personal story of awakening to antiracism. This is an essential work for anyone who wants to go beyond the

awareness of racism to the next step: contributing to the formation of a just and equitable society. Praise for How to Be an Antiracist “Ibram X. Kendi’s new book, *How to Be an Antiracist*, couldn’t come at a better time. . . . Kendi has gifted us with a book that is not only an essential instruction manual but also a memoir of the author’s own path from anti-black racism to anti-white racism and, finally, to antiracism. . . . *How to Be an Antiracist* gives us a clear and compelling way to approach, as Kendi puts it in his introduction, ‘the basic struggle we’re all in, the struggle to be fully human and to see that others are fully human.’ ”—NPR “Kendi dissects why in a society where so few people consider themselves to be racist the divisions and inequalities of racism remain so prevalent. *How to Be an Antiracist* punctures the myths of a post-racial America, examining what racism really is—and what we should do about it.”—Time

Between the World and Me

Groundbreaking analysis of the birth of racism in America. On the steps of the Lincoln Memorial in 1963, Martin Luther King outlined a dream of an America where people would not be judged by the color of their skin. That dream has yet to be realized, but some three centuries ago it was a reality. Back then, neither social practice nor law recognized any special privileges in connection with being white. But by the early decades of the eighteenth century, that had all changed. Racial oppression became the norm in the plantation colonies, and African Americans suffered under its yoke for more than two hundred years. In Volume II of *The Invention of the White Race*, Theodore Allen explores the transformation that turned African bond-laborers into slaves and segregated them from their fellow proletarians of European origin. In response to labor unrest, where solidarities were not determined by skin color, the plantation bourgeoisie sought to construct a buffer of poor whites, whose new racial identity would protect them from the enslavement visited upon African Americans. This was the invention of the white race, an act of cruel ingenuity that haunts America to this day. Allen’s acclaimed study has become indispensable in debates on the origins of racial oppression in America. In this updated edition, scholar Jeffrey B. Perry provides a new introduction, a select bibliography and a study guide.

Black People Invented Everything

Griffin turned himself into a black man to experience the sting of prejudice firsthand.
