With Science in a Jar, kids and grown-ups need only gather a jar and a few other inexpensive and readily available household objects to begin investigating and confirming the science at work all around them. The 30 experiments included cover various scientific disciplines: life science, earth science, physical science, weather, and more. Some activities, like creating a cloud in a jar, are quick experiments that can be performed over and over again. Others, like the earthworm habitat, will be enjoyed over time. Science in a Jar also features several projects that help demonstrate how science and art intertwine—the sometimes overlooked “ A ” in STEAM! Each experiment is headed by a supplies list and difficulty level, as well as a short description of the project to be undertaken and the scientific principles with which the readers will interact. Directions and photographs guide readers through the scientific method in each experiment, while short features offer multileveled reading opportunities with explanations of terms, interesting quick facts, and brief descriptions of how scientists apply the specific concepts that readers just witnessed in the larger world today. In addition to providing readers with a better understanding of basic scientific concepts, Science in a Jar ignites curiosity, increases confidence to investigate scientific concepts, and fosters a love of science.

There is journal space for daily musings and spaces for coloring. There are points of celebration for consistency and reflection, and little feet to remind you to move your body too. This journal was developed from years of counselor recommendations and hundreds of notebooks and systems trying to keep track of all the things. Yet, there was no all in one solution available. ### Find Your Synergy

So, here they are: Philip's first one hundred blog posts. It seemed useful to gather them here in one place. Some work better than others: some are inspired gems, some are about as inspiring as slime mould. Well, that just about sums us up, doesn't it: we are each of us something between a beautifully cut, multi-faceted diamond, and a blob of slime

mould (no offence intended towards the intelligent slime mould community out there). But why publish them in book form, when you can go and wade through Philip's blog site and read them for free? Well, this brings them together into a nice, neat, easily handled package for you. Furthermore, if you are a relative newcomer to the blog, you may have overlooked some of the earlier posts. It's also possible, though difficult to credit, that you may not have come across Philip's blog at all! If that is the case, then fear not: here is what you have always been looking for. And, finally, think how useful a paperback copy would be for propping up that uneven table leg! These blogs are more or less unchanged from the originals, as they have appeared on my blog site during the past year, except for the correction of a few typographical errors, and a little editing to make them more suitable for this format.. I think this is as it should be. They are not intended to present any unified theme, or any integrated whole. These are brief reflections, spontaneous expressions of what was on Philip's mind at the time. The opinions of the author (then) do not necessarily represent the opinions of the author (now).

## Christopher Dresser

This extensively illustrated survey affirms Christopher Dresser's status as the first professional product designer. One of the most influential and innovative figures of the nineteenth century, his work, in different media ranging from textiles to ceramics to metalwork, still appears contemporary and is highly prized by collectors today. Dresser was also a pioneer in his vision of industry as a means to spread the tenets of good design. Working with over fifty manufacturers, he produced an astonishing range of reasonably priced, widely available consumer goods, while his belief in the supremacy of form over ornament resulted in designs that were truly radical in relation to contemporary Victorian taste. Seven leading specialists in the field explore the impact of Christopher Dresser's work in the context of that of his contemporaries such as Pugin, Owen Jones and Godwin. Over 300 illustrations illuminate the vast scope of his output, from Gothic-Revival cast iron to the experimental and highly innovative shapes and glazes of Linthorpe ceramics and his astonishingly modern metalwork. This ground-breaking book reassesses not only individual designs (many of them previously unattributed) but also his varied sources of inspiration, including the strong Japanese influence in his later work, and the profound impact his work has had on future generations.
