My Journey with Dr. Sebi

If Nature didn't make it, don't take it - Dr. Sebi Over the millennia, many different alternative healing traditions emerged around the world and all of them were based on herbalism. The major herbal systems were often drastically different from what most of us know as "Western herbalism" and it has taken us a very long time to "decipher" the meaning and understand the concept of some of the ancient holistic systems such as Ayurveda, Traditional Chinese Medicine, Shamanic healing, etc. Today, we know that one of the ways to prevent a disease or recover from one, is through a diet and the alkaline diet is unarguably the healthiest diet there is. However, there is not a single alkaline diet and what made Dr. Sebi Alkaline Diet stand out, is that his methodology was based on both alkaline foods and medicinal herbs. Specifically in this book, you'll learn: Chapter 1: Why Electric Herbs? Proving That Alkaline Electric Herbs Work Herbal/Drug Interactions Chapter 2: Medicinal Plants and Herbs What are Herbs? The

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Dr Sebi Approved Herbs, Volume 1

Alkaline Herbal Medicine gives insight into many of the herbs used to reverse disease in Dr. Sebi's African Bio Mineral Balance. It covers scientifically supported properties, preparation, doses and dosages, and how to combine herbs. It addresses alkaline foods on the Dr. Sebi nutritional guide, and their chemical affinity with and support of the electric body. The natural order in life designed the body to be healthy and heal under the right conditions. These conditions are programmed into the DNA of Homo sapiens, whose base DNA makeup is the African genome. Diets centered on the consumption of natural alkaline plant foods and ample exposure to the sun supported the healthy expression of the African genome. The environment of Africa, and environments similar to Africa, produced life that developed with a complete and balanced electrical structure. The plant life that grew in these environments grew under optimal conditions in nutrient rich soil under year long exposure to the sun. The resulting chemical makeup of these natural alkaline plants protected them from environmental stresses. Africans originally ate diets centered on the consumption of these plants, like the great apes of Africa, and the programming of the African genome used the protective nature of these plants' nutrients to support its vibrancy. A scientific model supports the idea that Africans migrated out of Africa hundreds of thousands of years ago into the less hospitable environments of Europe and Asia. These environments didn't support the healthy expression of the African genome and resulted in the mutation of the gene and the development of the Neanderthal of Europe and Denisovan of East Asia. Science has linked diseases like lupus, Crohn's disease, and type 2 diabetes to the Neanderthal gene. The Neanderthals, who inhabited the Neanderthal caves in Germany, ate a diet centered on the consumption of meat. The combination of their meat-centered diet and adverse relationship with the sun led to the development of dis-ease in the body. Now, the meat-centered diet is being globalized and is spreading disease throughout the world. An alkaline plant-centered diet and the use of alkaline herbal medicine naturally support the healthy expression of the African genome in all people, and reverses chronic disease. Pharmaceutical medicine is built on the power of medicinal herbs because around fifty percent of its drugs are derived from herbs. The issue is industry has strategically conditioned people to forget about the healing power of natural alkaline herbs. I dedicate this book in the memory of Alfredo Bowman lovingly known as Dr. Sebi. He helped us to remember that natural alkaline herbs and plant foods support the healthy expression of the African genome that is in all people. He did this by sharing his African

Alkaline Plant Based Diet

Alkaline Plant Based Diet is my book *The God-Awakening Diet*, revised. This new edition titled *Alkaline Plant Based Diet* is re-branded to better identify what the book is about. It also includes some minor revisions to content for a more user-friendly experience. An alkaline plant based diet is instrumental in supporting health and vitality, reversing disease, and protecting the earth's ecosystem. It optimally supports a slightly alkaline pH level in the blood, which is the equilibrium point for the health of all the organs in the body. Consuming acidifying meat, dairy, and processed foods causes the body to rely on buffering systems to keep the blood's pH around 7.4. The body then strips alkaline material from bones and tissues to put into the bloodstream when the buffering systems are overwhelmed. This compromises the health of organs and allows for the proliferation of pathogens and toxins. The global assimilation of the Western diet, which is centered on the consumption of meat, dairy, and processed foods, supports industrial processes that compromise the natural life supporting patterns of the earth's ecosystem, and supports the proliferation of disease in the body and in the earth. Diets centered on the consumption of meat, dairy, and processed foods are the catalyst of the inhumane treatment of animals, deforestation, land erosion, depletion of fresh water, and intensified climate change. The mechanisms employed to satisfy the demand for meat, dairy, and processed foods severely compromise the natural patterns that support all life on earth.
