How to Keep Your Focus

For at least a century, across the United States, Mexican American athletes have actively participated in community-based, interscholastic, and professional sports. The people of the ranchos and the barrios have used sport for recreation, leisure, and community bonding. Until now, though, relatively few historians have focused on the sports participation of Latinos, including the numerically preponderant Mexican Americans. This volume gathers an important collection of such studies, arranged in rough chronological order, spanning the period from the late 1920s to the present. They survey and analyze sporting experiences and organizations, as well as their impact on communal and individual lives. Contributions spotlight diverse fields of athletic endeavor: baseball, football, soccer, boxing, track, and softball. Mexican Americans and Sports contributes to the emerging understanding of the value of sport to minority populations in communities throughout the United States. Those interested in sports history will benefit from the book's focus on under-studied Mexican American participation, and those interested in Mexican American history will welcome the insight into this aspect of the group's social history.

You've developed a top-notch business plan. Now what? It's time to execute. The aim of The Triangle Strategy is to demystify the complexities of the performance process. Though leadership works hard to develop smart, comprehensive strategies, it often doesn't pay enough attention to the discipline and focus required for day-to-day execution. In response, this book introduces the Triangle Performance Model, a practical, easily applied framework that provides managers-and the people who work for them-a clear understanding of what it takes to create a high-performance workplace. The Triangle Strategy reinforces an interactive approach for managing and leading. It provides managers and their teams with a powerful collaborative tool that focuses a team's attention on the most critical performance

elements, fosters an open flow of ideas, and provides a framework for organizing these thoughts into effective action plans.

Take a snapshot of your life. Does it look and feel out of focus and blurry? Think about your life like you would a photograph. When it is out of focus what you see is blurry or fuzzy. The last time you took a picture and the camera focus was off or not working, were you disappointed with the result? Could be that the people or the scenery were so blurred that it made everything in the picture unrecognizable. What did you do with it? Did you delete it or toss it out if it was a print? Someone who is constantly distracted with trivial tweets, computer games, a constant flow of junk email and Smartphone apps will not be nearly as successful as someone who can and does focus his or her mind and behavior. Learning to do this is truly like learning how to unleash the power of your mind. You have a potent tool available when your mind is focused and you make a purposeful decision to concentrate. Let me ask you, how many times do you check your email, Facebook page and Twitter account per hour? If you are the average heavy multitasker, your answer will be 37 times plus! Now ask yourself this question. What is this doing for you? Are you smarter? Are you wealthier? How about happier? Maybe it is high time you seriously looked into this whole idea of focused attention.

The problems with sports and our youngsters are reported almost daily in our newspapers and TV news. We adults must become active in eliminating the verbal and emotional abuse that many of our kids are

experiencing in their participation in sports. The common values; sportsmanship, teamwork, responsibility, fairness, respect, discipline, and the enjoyment of playing; are being eroded in the name of winning at all costs and in the fulfilling of the goals of coaches and parents. Coaches and parents must empower their kids to grow and develop healthy bodies and minds. They must create an environment in which the kids can have joyful experiences playing soccer, baseball, softball, football, hockey, and other great games. The author has been a teacher and coach for over 50 years, working with elementary, junior high school, high school, and adult teams. In this book he presents practical, proactive ways to: -- Have Parents and Coaches work together for their players and children. -- Have Coaches work positively and effectively with their players. -- Have Parents, in the family setting, deal positively and effectively with their children's sports ventures.
