### TAULOTO a Tamaiti i Le Gagana Samoa

The task of living in modern New Zealand – and especially in modern Auckland – is not just to understand how to live with different peoples, but how to adapt to the future that has already happened. New Zealand is a nation that exists on Pacific Islands, but does not, will not, perhaps cannot, see itself as a Pacific Island nation. Yet turning to the Pacific, argues Damon Salesa, enables us to grasp a fuller understanding of what life is really like on these shores. After all, Salesa argues, in many ways New Zealand's Pacific future has already happened. Setting a course through the "islands" of Pacific life in New Zealand – Ōtara, Tokoroa, Porirua, Ōamaru and beyond – he charts a country becoming "even more Pacific by the hour". What would it mean, this far-sighted book asks, for New Zealand to recognise its Pacific talent and finally act like a Pacific nation?

Samoan Reference Grammar is the first extensive grammar of Samoan, by number of speakers the largest Polynesian language. The grammar is divided into eighteen chapters which cover phonetics, phonology, and orthography, word classification and morphology, the syntax of various types of phrases, simple clause structure, nominalization, dependent clauses, coordination, and finally, case marking and grammatical relations. The descriptive framework is not tied to a particular linguistic theory, but is based on the empirical findings of linguistic typology during the last two decades. The grammar is descriptive in the sense that it takes the Samoan ways of expression as the starting point of analysis and describes the meanings which are encoded by the various types of construction.

#### Samoan Medical Belief and Practice

Nominative-accusative and ergative are two common alignment types found across languages. In the former type, the subject of an intransitive verb and the subject of a transitive verb are expressed the same way, and differently from the object of a transitive. In ergative languages, the subject of an intransitive and the object of a transitive appear in the same form, the absolutive, and the transitive subject has a special, ergative, form. Ergative languages often follow very different patterns, thus evading a uniform description and analysis. A simple explanation for that has to do with the idea that ergative languages, much as their nominative-accusative counterparts, do not form a uniform class. In this book, Maria Polinsky argues that ergative languages instantiate two main types, the one where the ergative subject is a prepositional phrase (PP-ergatives) and the one with a noun-phrase ergative. Each type is internally consistent and is characterized by a set of well-defined properties. The book begins with an analysis of syntactic ergativity, which as Polinsky argues, is a manifestation of the PP-ergative type. Polinsky discusses diagnostic properties that define PPs in general and then goes to show that a subset of ergative expressions fit the profile of PPs. Several alternative analyses have been proposed to account for syntactic ergativity; the book presents and outlines these analyses and offers further considerations in support of the PP-ergativity approach. The book then discusses the second type, DP-ergative languages, and traces the diachronic connection between the two types. The book includes two chapters illustrating paradigm PP-ergative and DP-ergative languages: Tongan and Tsez. The data used in these descriptions come from Polinsky's original fieldwork hence presenting new empirical facts from both languages.

### Tamaitai Samoa

"Jean Tekura Mason's poetry reflects her life as a person living in two worlds - Polynesian and European. Some of her poems are reflective. Others are glib (and deliberately so). There is humour and there is passion - of love and hate, pagan faiths and Christian beliefs, ancestors and dancers, customs and politics, migrants and immigrants, and Pacific flora and fauna - all have stimulated Ms Mason to put pen to paper. At times incisive and descriptive, and at others deeply moving, this book is a collection of poems which is both retrospective perceptive"--Back cover.

### Wild Kinship

Like many 13-year-old girls, Sofias main worries are how to get some groovy go-go boots, and how not to die of embarrassment giving a speech at school! Through her heartfelt diary entries, we witness the terror of being dawn-raided and gain an insight into the courageous and tireless work of the Polynesian Panthers in the 1970s as they encourage immigrant families across New Zealand to stand up for their rights.

### Sāmoan Queer Lives

This book "Anoafale" describes the inter relationship of the language and culture within the "matai" or the chiefly system of the Samoan people. The language serves as an instrument that performs various aspects of the culture within the matai system. The Samoan people are culturally oriented and to live

and understand the system one must understand the language and its culture. The matai system is based on small family units and the matai is the chief of that family unit. Several family units make up a village which is ruled by a village council. The council makes the rules and regulations that govern the village as a whole, and each family matai is represented there. The purpose of this book is to remind the younger generation of the importance of their heritage which has been passed down through many generations.
