never been more critical. In this practical and important book, each chapter is written by specialists in a particular area devoted to the care of service members and includes case material to demonstrate assessment and intervention approaches. The reader is introduced to the world of the military and the subsequent development of mental health services for returning men and women. Chapters look at special populations of service members with specific needs based directly on their experience in the military, discussing post-traumatic stress disorder, traumatic brain injury, sexual harassment and assault during their service, and the physiology of the war zone experience. The challenges faced by reintegrating service men and women are explored in detail and include family issues, suicide, and substance use disorders. A section on services available to returning service members looks at those offered by the Veterans Administration and at the use of animal-assisted interventions. The book concludes with a section devoted to unique concerns for the practitioner and explores ethical concerns they may face and their own needs as clinicians working with this population.

edition. As a casebook, *Social Work in Health Settings* provides you with an excellent opportunity for understanding particular techniques and interventions. You'll find examples from expert practitioners in a variety of health settings and a thorough integration of social work theory and practice that eliminates the need to assign other supplements for undergraduate/graduate sequences in health care. The book will also help you promote discussions of issues that arise when working in particular settings and with certain populations. *Social Work in Health Settings* presents a framework called "practice in context," developed as a tool for teaching and evaluation, that addresses the three dimensions of context thought to have the most direct consequences for the relationship between social worker and client--policy, technology, and organization. The framework is applied to 32 settings (ten more than the first edition!) drawn from services to children and/or families; acute and high-technology care; rehabilitation, long-term intervention and advocacy; mental health care; and care for the frail elderly and hospice care. *Social Work in Health Settings* enables you, as a social work professional, to understand the context in which your work with clients occurs, in order to interpret and influence the important dimensions of your client contact. This thought-provoking volume will also encourage educators and students to understand the decisions that affect the helping relationship so that the needs of clients can be evaluated and met properly. In this era of managed care, downsizing, and cost-cutting, the approach in *Social Work in Health Settings* proves more salient than ever before.

While policy makers are perpetually conceptualizing new reform packages, the actual enactment of those reforms is typically more challenging. Remarkably, the one public institution that is able to meet that challenge is also the largest. The United States Department of Defense, which employs over 600,000 people and deals with \$500 billion in funding, has proven itself quite capable of successfully implementing reforms in an ever-changing environment. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities; mental health; and mainstream services targeting women as well as emerging areas of developmental social work practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective.

This new handbook provides an introduction to current sociological and behavioral research on the effects of the wars in Iraq and Afghanistan. The wars in Iraq and Afghanistan represent two of the most interesting and potentially troubling events of recent decades. Analyzing the effect of the two wars on military personnel and civilians, this volume is divided into four main parts: Part I: War on the Ground: Combat and Its Aftermath Part II: War on the Ground: Non-Combat Operations, Noncombatants, and Operators Part III: The War Back Home: The Social Construction of War, Its Heroes, And Its Enemies Part IV: The War Back Home: Families and Youth on the Home Front With contributions from leading academic sociologists, anthropologists, psychologists, military researchers, and researchers affiliated with Non-Governmental Organizations (NGOs), this Handbook will be of interest to students of the Iraq and Afghanistan wars, military sociology and psychology, war studies, anthropology, US politics, and of youth.
