and Namonyah Soipan. □ By a widely published scholar, poet, and activist who has been interviewed by the press, television, and National Public Radio's All Things Considered From the last part of the twentieth century through today, African-American women have experienced a revival of spirituality and creative force, fashioning a uniquely African-American way to connect with the divine. In Soul Talk, Akasha Gloria Hull examines this multifaceted spirituality that has both fostered personal healing and functioned as a formidable weapon against racism and social injustice. Through fascinating and heartfelt conversations with some of today's most creative and powerful women--women whose spirituality encompasses, among others, traditional Christianity, Tibetan Buddhism, Native American teachings, meditation, the I Ching, and African-derived ancestral reverence--the author explores how this new spiritual consciousness is manifested, how it affects the women who practice it, and how its effects can be carried to others. Using a unique and readable blend of interviews, storytelling, literary critique, and practical suggestions of ways readers can incorporate similar renewal into their daily lives, Soul Talk shows how personal and social change are possible through reconnection with the spirit.

Examines the ways in which the inclusion of African diasporic religious practices serves as a transgressive tool in narrative discourses in the Americas. *Oshun's Daughters* examines representations of African diasporic religions from novels and poems written by women in the United States, the Spanish Caribbean, and Brazil. In spite of differences in age, language, and nationality, these women writers all turn to variations of traditional Yoruba religion (Santería/Regla de Ocha and Candomblé) as a source of inspiration for creating

portraits of womanhood. Within these religious systems, binaries that dominate European thought—man/woman, mind/body, light/dark, good/evil—do not function in the same way, as the emphasis is not on extremes but on balancing or reconciling these radical differences. Involvement with these African diasporic religions thus provides alternative models of womanhood that differ substantially from those found in dominant Western patriarchal culture, namely, that of virgin, asexual wife/mother, and whore. Instead we find images of the sexual woman, who enjoys her body without any sense of shame; the mother, who nurtures her children without sacrificing herself; and the warrior woman, who actively resists demands that she conform to one-dimensional stereotypes of womanhood.

## Black Gods and Kings

This book is a methodical and systematic presentation of basic ontological issues that must be raised with respect to the meaning and function of natural science. The ontological issues are discussed from a hermeneutico-phenomenological point of view. In addition, the book contains critical discussions of basic themes raised by Carnap, Hempel, Stegmüller, Kuhn, Lakatos, Hübner, Popper, van Fraassen, Heelan and Kisiel. One of the basic theses developed in the book is that logical, epistemological and methodological issues pertinent to the natural sciences should be complemented by ontological issues that focus mainly on meaning and truth. The book also contains one chapter on the implications of the ontological ideas presented for the history of the natural sciences.

## What We Were Promised

African American spirituality plays a central role in the formation and practice of Black freedom in America. This freedom is primarily spiritual and cultural and has a significant role in shaping Black consciousness, behavior and belief. It has created a cultural archive or black culture soul, which shapes the colors, content, timber and texture of the African American communities. Unlike other paradigms which posit the social, political and economic imperatives of freedom, the African American model stipulates the vital role of Black spirituality. This spirituality embodies the creation and sustenance of Black culture, establishes psychological and spiritual relocation in response to oppression, and equips African Americans with the spiritual tools for their physical, vocational and institutional survival. A central thesis of the book is that African American spirituality, by the way it shapes and informs black life, creates a unique praxis of freedom. Most importantly is the way Black spirituality is expressed in Black culture, the Black church and Black life values. Creativity is, therefore, essential to freedom. That freedom is manifested in everything from the development of jazz as a sui generis and indigenous art form, to the ways

Black people walk, talk, interpret and oppositionally express themselves in the world. Such creativity is indispensable to the formation and preservation of Black life. It has been used by African Americans as a powerful weapon in maintaining identity and creating a spirituality of culture and a culture of spirituality, which have largely thwarted their complete psychological and physical annihilation

### Pussy Prayers

For centuries, unicorns have inspired, enchanted and eluded humanity. The beast appears in the Old Testament and there was a brisk trade in unicorn parts in medieval times, with travellers regularly reporting sightings into the modern era. But by the early twentieth century scientists had conceded that the unicorn never existed. It turns out they were a little hasty. Where did the unicorn come from, and how was it accepted as a part of the animal kingdom for so long? Chris Lavers argues that although the unicorn of our imagination isn't real, traces of its character can be found in existing species. In this lively and vivid exploration of the natural world, Lavers follows the beast's trail to the plateaus of India and into the jungles of Africa to unearth the flesh and blood ancestors of our iconic unicorn.

In this book, Katrina Hazzard-Donald explores African Americans' experience and practice of the herbal, healing folk belief tradition known as Hoodoo. Working against conventional scholarship, Hazzard-Donald argues that Hoodoo emerged first in three distinct regions she calls "regional Hoodoo clusters" and that after the turn of the nineteenth century, Hoodoo took on a national rather than regional profile. The first interdisciplinary examination to incorporate a full glossary of Hoodoo culture, *Mojo Workin': The Old African American Hoodoo System* lays out the movement of Hoodoo against a series of watershed changes in the American cultural landscape. Throughout, Hazzard-Donald distinguishes between "Old tradition Black Belt Hoodoo" and commercially marketed forms that have been controlled, modified, and often fabricated by outsiders; this study focuses on the hidden system operating almost exclusively among African Americans in the Black spiritual underground.

Our present ecological crisis: global warming, water and air pollution, starvation and war are all manifestations of our disregard for the Earth, Her gifts and Her children. The world needs leadership that emphasizes Reverence, Community, and Peacekeeping. And this can only happen in an atmosphere of mutual respect and sharing. We must do this without arrogance and we must overcome our ignorance. This book as an offering of guidelines and protocols to heal our relationship to sacred lands and to each other. ## Dyamond in the Rough

Creating institutions to meet the challenge of sustainability is arguably the most important task confronting society; it is also dauntingly complex. Ecological, economic, and social elements all play a role, but despite ongoing efforts, researchers have yet to succeed in integrating the various disciplines in a way that gives adequate representation to the insights of each. Panarchy, a term devised to describe evolving hierarchical systems with multiple interrelated elements, offers an important new framework for understanding and resolving this dilemma. Panarchy is the structure in which systems, including those of nature (e.g., forests) and of humans (e.g., capitalism), as well as combined human-natural systems (e.g., institutions that govern natural resource use such as the Forest Service), are interlinked in continual adaptive cycles of growth, accumulation, restructuring, and renewal. These transformational cycles take place at scales ranging from a drop of water to the biosphere, over periods from days to geologic epochs. By understanding these cycles and their scales, researchers can identify the points at which a system is capable of accepting positive change, and can use those leverage points to foster resilience and sustainability within the system. This volume brings together leading thinkers on the subject -- including Fikret Berkes, Buz Brock, Steve Carpenter, Carl Folke, Lance Gunderson, C.S. Holling, Don Ludwig, Karl-Goran Maler, Charles Perrings, Marten Scheffer, Brian Walker, and Frances Westley -- to develop and examine the concept of panarchy and to consider how it can be applied to human, natural, and human-natural systems. Throughout, contributors seek to identify adaptive approaches to management that recognize uncertainty and encourage innovation while

fostering resilience. The book is a fundamental new development in a widely acclaimed line of inquiry. It represents the first step in integrating disciplinary knowledge for the adaptive management of human-natural systems across widely divergent scales, and offers an important base of knowledge from which institutions for adaptive management can be developed. It will be an invaluable source of ideas and understanding for students, researchers, and professionals involved with ecology, conservation biology, ecological economics, environmental policy, or related fields.
