This book Beyond Four Borders is about marriage challenges of the South African citizens who are married to Africans from Africa. The damage of the division of Africa a long time ago still is felt today. The different languages, cultures, perceptions, and stereotypes. Some South African mothers even go to the extent of cursing their daughters married to Africans from Africa. Some African mothers from Africa also don't approve South African ladies. We need to address this in order to allow our children to marry those they love. In this book I'm focusing on those who are struggling in marriages. These are usually the middle class and the lower class people. The rich don't experience these challenges. God gave me the title Beyond Four Borders based on that my husband Katalay was beyond four borders when I wrote this book. Katalay comes from Democratic Republic of Congo, when traveling by road, he goes through Zambia (2 borders), Zimbabwe (2 borders) then enter South African border. L'amour and I suffered hardship when Katalay was in Congo for over four years. The lies, gossiping, humiliation at home, in the community and some churches. The false beliefs that "foreign nationals marry South African women for identity document and to get resources. That African men from Africa come to South Africa already married and marry South African women as second wives. Denying African men from visiting their parents and siblings accusing them of visiting their wives and children. Now also added is falsely accusing foreign nationals of being human traffickers without any proof." Children of South Africans and African parents hide their identities at school for fear of discrimination. My daughter L'amour is asked by her classmates what nationality she is. They don't understand why her name is L'amour and not an African name. Some women and children why L'amour is taller than her classmates. There are children from various African countries who hide their identities because the moment it is known they are called derogative names. One day I took L'amour at a public park, I heard some kids between 7 - 10 years old telling a young Zimbabwean boy to go to his country and stop using a South African swing. The boy just kept quiet and kept playing. I did watch to make sure the boy was not beaten by his bullies. As individuals we have to make sure we promote loving our fellow human beings in spite of where they come from. There are people who think I'm from Africa and not a South African. That does not bother me. This happened even before the democracy of South Africa. I remember applying for an identity document, I spent two years going to Home Affairs Department, every Mondays, Wednesdays and Fridays after school to apply for my identify document. Home Affairs told me to go to Zimbabwe or Mozambique to bring my father. What a humiliation it was. This book is also based on my personal challenges being married to a Congolese and of others I have met with similar problems. My domineering and controlling mother and relatives rejecting my husband. My husband's domineering and controlling mother who rejected me.

Katalay's mother and sister calling me a foreigner, on the other hand my mother, siblings and some relatives calling Katalay a foreigner. These inflictions of pain went on for over 10 years of our marriage. When they failed on talking they resorted to witchcraft. It is unfair that parents choose for their children who to marry. To claim to care and protect their children. The phenomenon of choosing marriage partners by parents for their children is an unfair practice. Such parents usually have their interest in heart and not that of their children. Some of these children after agreeing to the arranged marriage they turn to drugs and alcohol to deal with the pressure. Some even abuse their spouses.

Amphibians and Reptiles

Ermolai bowed and returned to the garden. The "barinia" left the veranda, where she had come for this conversation with the old servant of General Trebassof, her husband, and returned to the dining-room in the datcha des Iles, where the gay Councilor Ivan Petrovitch was regaling his amused associates with his latest exploit at Cubat's resort. They were a noisy company, and certainly the quietest among them was not the general, who nursed on a sofa the leg which still held him captive after the recent attack, that to his old coachman and his two piebald horses had proved fatal. The story of the always-amiable Ivan Petrovitch (a lively, little, elderly man with his head bald as an egg) was about the evening before. After having, as he said, "recure la bouche" for these gentlemen spoke French like their own language and used it among themselves to keep their servants from understanding—after having wet his whistle with a large glass of sparkling rosy French wine, he cried: "You would have laughed, Feodor Feodorovitch. We had sung songs on the Barque* and then the Bohemians left with their music and we went out onto the river-bank to stretch our legs and cool our faces in the freshness of the dawn, when a company of Cossacks of the Guard came along. I knew the officer in command and invited him to come along with us and drink the Emperor's health at Cubat's place. That officer, Feodor Feodorovitch, is a man who knows vintages and boasts that he has never swallowed a glass of anything so common as Crimean wine. When I named champagne he cried, 'Vive l'Empereur!' A true patriot. So we started, merry as school-children. The entire company followed, then all the diners playing little whistles, and all the servants besides, single file. At Cubat's I hated to leave the companion-officers of my friend at the door, so I invited them in, too. They accepted, naturally. But the subalterns were thirsty as well. I understand discipline. You know, Feodor Feodorovitch, that I am a stickler for discipline. Just because one is gay of a spring morning, discipline should not be forgotten. I invited the officers to drink in a private room, and sent the subalterns into the main hall of the restaurant. Then the soldiers were thirsty, too, and I had drinks served to them out in the courtyard. Then, my word, there was a perplexing business, for now the horses whinnied. The brave horses, Feodor Feodorovitch, who also wished to drink the health of the Emperor. I was bothered about the discipline. Hall, court, all were full. And I could not put the horses in private rooms. Well, I made them carry out champagne in pails and then came the perplexing business I had tried so hard to avoid, a grand mixture of boots and horse-shoes that was certainly the liveliest thing I have ever seen in my life. But the horses were the most joyous, and danced as if a torch was held under their nostrils, and all of them, my word! were ready to throw their riders because

the men were not of the same mind with them as to the route to follow! From our window we laughed fit to kill at such a mixture of sprawling boots and dancing hoofs. But the troopers finally got all their horses to barracks, with patience, for the Emperor's cavalry are the best riders in the world, Feodor Feodorovitch. And we certainly had a great laugh!—Your health, Matrena Petrovna."

Scripture Night Lights

If you have ever wondered, "How and when did we first know that atoms contain 'sub-atomic' particles?", you will enjoy reading this book. Who first discovered that atoms are not the smallest bits in the world? We do not mean: Who first guessed these things? The guesses took place in ancient times, during BCE days (Before the Common Era). We are asking, "Are the answers to such questions really available in easily readable form?" A person who asks, "Where can I find such answers?", is a good candidate to read this work. Read this and learn who first conceived of light being in particle form. As a consequence, now we can be certain that light behaves at times as waves, and at other times as particles. That person's ideas fostered the relatively new branch of physics known as Quantum Mechanics. Even though Albert Einstein used the idea that light acts like a particle sometimes in order to work out his theory of photoelectricity, he never could bring himself to believe wholeheartedly in some of the postulates and implications of Quantum Mechanics. He could never accept that the details of a two-particle problem always resorted to statistics to describe what actually happened. Albert E. always felt that, in nature, one could invariably calculate all the details of interactions in a direct fashion. As Dr. Einstein said, "God does not play dice with the universe." However, QM disagrees with Einstein here, and with other specifics as well. The second major part of this writing pertains to light, and some of its wonders. In our world of ancient history, even in the pre-scientific days, many declared that light crossed distances in an instant - that is, at truly infinite speed. No one had any idea how to find out if that declaration were true. Not until, that is, in the 1600s, when a little known Dutchman devised a way to measure light's speed - at least the light that traveled from Jupiter's moon Io to Earth. This

How To Download eBook Night Light The Restoration Series Book 2

book tells all about this landmark observation, as well as many others pertaining to light and its speed. One of the landmark experiments of all time must be the one which gave us the amount of charge on an electron. It also pointed out that all electrons have precisely the same amount of charge. Here, we read about the design and the execution of this experiment. Knowing this charge, it was relatively easy to next determine how much an electron weighs. This was done by building mass spectrometers - a huge field which is touched upon in these pages. It is not necessary to know anything about physics, or mathematics, in order to be able to understand the subject matter. In places, some math relationships are given to help the reader see how relatively simple the math is. But the reader may skip the math entirely without losing the meaning of the discussion. A word about the author Bill Grubbs began his professional life as an electrical engineer. By his mid-twenties, he realized just how abysmally ignorant he truly was. He knew little about fundamentals of the natural world. To help himself to partially overcome this problem, he began a study of physics in earnest. When he had earned his MS in Solid State Physics, he turned to going the next step: to earn a Ph.D. Soon, he concluded that the doctorate would likely not result in expanding his understanding of worldly things - his goal - so he quit his formal studies, and simply increased his knowledge in those areas that piqued his curiosity. He still gets a thrill from running into a thing beyond his understanding, then learning whatever is needed to gain the desired level of understanding of that phenomenon. A good part of this writing is aimed at people who have a wish to 'understand what makes the various parts of the world tick', and 'how do we know it?

Continuing the Open-Ended Novel began with WHAAM!, followed by Exiles, Siren moves the dramatis personae through the years 1974, 1975 and 1976. The arrow of time moves forward, pop culture styles metamorphose, political transformations occur, requiring adjustments from the dramatis personae who are swept along in the slipstream. Set against the flow of time is Quantum Physics and a Zen ethos which create tensions for the dramatis personae, especially visible through all facets of the Pop Culture centered within the novel. Ultimately there is no resolution, only forward momentum, the dramatis personae unable to shape how the subsequent years, 1977, 1978 and 1979 will unfold.

Volume # 5 of The Bregdan Chronicles continues the sweeping saga that now encompasses the final year of the American Civil War. ** How many books will be in the Bregdan Chronicles? You'll have to ask God about that I intend to write these character's stories, one year at a time, for as long as I'm able to write. I'm passionate about bringing history to life through historical fiction. Since I'm amazingly healthy, that could be for a very long time! I don't like stories to end any more than you do. This one won't end for a very long time! Ginny Dye Review: I waited to give a review until I had read the first 5 books. one.sometimes in the wee hours of the morning, when my tail should have been asleep. The writing style of this author brings you right into the story as if you are a part of it. She has amazing talent to capture the imagination, and bring you right into a virtual reality. I have fallen in love with every one of these characters, and have become completely entranced with each life represented. The historical account of this time period was so right on, so very vivid, you almost feel like you've walked right into it. These books became so alive, I actually had dreams at night of battle. (I'm not even kidding.) But it goes further. There were conversations in these books that had me reading over them several times. Life lessons. Sage advice. The kind of wisdom that comes from everyday life. God moments that were so profound, they pierced my heart with an accuracy that I can't even begin to explain. Many times, the lives and hearts of each character were changed and rocked with revelation that came about in a moment, yet, so deeply touching the deepest recesses of the heart, that you can't go beyond it, without it having changed you as well, as you read it. Thank you Ginny Dyenot only for an amazing journey.but for those God and light bulb moments throughout each book, that reached beyond the pages, and made their home inside the soul. What can I say overall? Well, let me put it like this: these books are like "Gone with the Wind" meets up with "Eat,Pray,Love"; then whispers some "Secret life of Bees", forges some "Steel Magnolia", and at times, wraps itself with the "Color Purple." Sigh. Did I mention how much I loved these books?

This unique collection brings back into print some of the lesser known poems of James ('B.V'.) Thomson (1834-82) as well as his acclaimed The City of Dreadful Night. Composed in the later half of the nineteenth-century, many of Thomson's post-Christian poems challenge the securities of Victorian religious comfort and sceptically view the human condition as devoid of connection with any providential sustenance.
