Relax with Seurat's bathers along the Seine while you recreate the artist's colorful masterpiece with stickers. Georges Seurat's Bathers at Asnières is one of the most famous and popular paintings in London's National Gallery. This activity book allows adults and children to understand how the artist used colors to create vibrant and luminous scenes. Opening with a brief informative essay, this book contains thousands of colored round stickers and a poster "canvas" of colored outlines - readers simply need to match the stickers to the outlines found on the poster to recreate the painting. It's not necessary to place each sticker on precisely the right outline. As a result, every finished poster will be its own original work of art. With a handy folder-style flap that allows for easy storage and transportation of the artwork in progress, this activity book is perfect for hours of entertainment, relaxation, or meditation, as well as for unwinding at the end of a busy day.

Products that Last starts where most books on product development end. This new edition (first self-published by the TU Delft in 2014) contains new examples and insights from recent publications. From the perspective of designers and entrepreneurs, once a product has been designed, produced and sold, it disappears beyond the newness horizon. They are little aware of the opportunities that exist in the next product universe, where money is made from products in use, as well as from a product's afterlife. These opportunities clearly exist, otherwise they would not be providing an income for so many people. However, to be

recognized as segments of a circle of continuous value creation, they need reframing. The book offers readers an innovative and practical methodology to unravel a product's afterlife and systematically evaluate it for new opportunities. It introduces business models that enable us to benefit from the opportunities offered by a much longer product life. Products that Last changes the way designers and entrepreneurs develop and exploit goods, helping reduce material and energy consumption over time. Nothing more, nothing less.

The magic of Paint by Sticker Kids continues, combining the fun of coloring and stickers with the creativity of paint by number. The series just keeps growing, with another much-loved nature-themed topic: Bugs! Paint by Sticker Kids: Beautiful Bugs includes everything kids need to create 10 full-color illustrations of their favorite creepy-crawlies: a firefly, a praying mantis, a ladybug, butterflies, ants, a painted grasshopper, a dragonfly, beetles, a bumblebee, and a weevil. Simply find the numbered sticker, peel it, and place it in the right space. Add the next, and the next—and watch a dazzling image come to life with color and spirit in the modern “low-poly” style (using geometric polygon shapes). The card-stock pages are perforated so artwork can be easily removed for framing or the fridge. Creating sticker art is as fun and meditative as coloring, and it's a refreshing shake-up from the usual crayons and markers. Plus, the peel-and-place system allows kids to practice recognizing and learning numbers in an interactive, stress-free way. And it's a great rainy day or travel activity (no cleanup!) that delivers hands-on fun for less than \$10.
