Behavior Change in the Human Services

Cruelty and Laughter

A Ramble Round the Globe

A rollicking review of popular culture in 18th century Britain this text turns away from sentimental and polite literature to focus instead on the jestbooks, farces, comic periodicals variety shows and minor comic novels that portray a society in which no subject was taboo and political correctness unimagined.

The Law of Evidence applicable to the Courts of the East India Company, explained in a course of lectures delivered by J. B. Norton

This is a book about the path of Jesus Christ and one man's observations while trying to walk it. It is not for the faint of heart, or of faith. It is written to Christians, primarily about Christians and the Church in general. At times, it is brutally honest. It challenges modern "Christian" teachings with the faith of those Christians who came before us. It speaks with the voice of the ancient Church within the language of psychology and today's pop culture. It shouts for a return to the core principles of what Jesus taught. It cries out that the first person who needs to be discipled is one's own self.

The Fundamental Crisis in Psychiatry

Alternative Dispute Resolution

Presents a selection of 30 gentle walks which map out ecological improvements, industrial archaeology, tourist attractions and geographical features of the River Mersey. This book is illustrated with photographs and is suitable both for family outings and for enthusiasts of local history and ecology.

Histoire Sociale

A Ramble Round the World, 1871, Tr. by Lady Herbert

This is not a history of chemistry which uses stamps instead of the usual illustrations, but a collection of short essays and comments on such chemistry as can be found on postage stamps and other philatelic items. In other words, the choice of topics is dictated by the philatelic material available, with the necessary consequence that important parts of chemical history will be missing for the simple reason that they have not found their way onto postage stamps. Thus, the reader may find detailed comments on lesser known chemists, such as Wilhelm August Lampadius who has been honoured with two stamps by the German Post Office, but hardly anything on such luminaries as Robert Bunsen, who have not been deemed worthy of a commemorative issue.

His ramblings will make you laugh, provoke great insights, make you wonder about the universe, philosophy and religion.
