Sabi Perez is the last Diamond Crier, only she doesn't know it. Not until a crazed ruler from another world comes to collect her priceless tears and won't take no for an answer. Living in New York, Sabi's seen some nasty things, but the lengths to which her captor will go to keep his crown are things found only in the darkest nightmares. Afraid and alone, Sabi finds solace in her cellmate, Anya, and Cabal, a fellow Crier who also has powers, a rare combination that buys his favor from the ruler, only it's a favor he doesn't want. In a fit of rage, power erupts out of Sabi, the same power Cabal has, and a spark of hope ignites. Together they may have a chance at escape, something no other Crier has done. Except a ruler hellbent on draining them of every last diamond tear isn't their only hurdle. If they escape they'll be hunted to the ends of the earth, if they survive the trek to safety. If they stay the ruler will leech them dry. Sabi would rather die trying than lie down and die, even if that means running away into even more danger.

Diamond Star

A collection of traditional quilts updated with Piece O'Cake style. The nine traditional American quilt projects are reinvented in woven plaids and stripes. Using a mix of applique, piecing and foundation piecing patterns, these designs include Pretty in Plaid, Royal Plumes and Neapolitan Nights. There are many tips and instructions to help readers get started immediately.

Report of the Annual Meeting

Let your love of lone star quilts guide you into a surprising world of piece-abilities! Acclaimed quilter and teacher Barbara Cline shares exciting new techniques for constructing eight-pointed star quilts from diamonds. No tricky seams here! You'll be amazed at how easy these quilts are to assemble. Build your skills as you start with basic star shapes and work your way up to radiant starbursts designs. With 12 celestial projects, there's truly something for every quilter.

Discover the wonderful secret the Earth holds for us-that the stars of the galaxy live on our planet. Holograms of high-magnitude stars over holy mountains. Physical travel to other planets through stargates on the Earth's surface. Near instantaneous transportation across the planet through quick-way portals. Outrageous science fiction or sober geomantic fact? Earth Mysteries researcher Richard Leviton

Free Copy Stars On The Diamond

takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us. Stars on the Earth combines scholarship, clairvoyance, and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars. It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet. Our planet was precisely designed and implemented for us, and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens. Why are so many of the Earth's mountains said to be holy, producing visions and encounters with the "gods?" They all have canopies of light called domes, each transmitting the presence of a galactic star. What is the geomantic origin of the Bermuda Triangle? Two dysfunctional stargates. If working properly, they and the Earth's other two million stargates could transport us rapidly to other planets. Is there a way to travel quickly across the planet without using cars, airplanes, boats, or trains? Yes, and it's called a traversable wormhole, and the Earth has thousands of them awaiting our discovery and use. Come join the tour of a planet you've never seen before: our own star-infused Earth.

The Diamond Fairy Book

Del was a rock singer. He was also the renegade son of the Ruby Dynasty, which made his career choice less than respectable, and gave him more to worry about than getting gigs and not getting cheated by recording companies, club owners, or his agent. For one thing, the Ruby Dynasty ruled the Skolian Imperialate, an interstellar Empire, which had recently had a war with another empire, the Eubian Concord. For another, Del was singing on Earth, which was part of a third interstellar civilization, and one which had an uneasy relationship with the Imperialate. Del undeniably had talent, and was rapidly rising from an unknown fringe artist to stardom. But, with his life entangled in the politics of three interstellar civilizations, whether he wanted that or not, talent might not be enough. And that factor might have much more effect than his music on the lives of trillions of people on the thousands of

Scientific American

Dancing with the Diamond Star is a story about a light being that is completely self-aware as an expression of Divinity. Then in response to the call of Love the Diamond Star Light becomes the dance of Life in human form as a baby. As she grows older she begins to shift away from the greater truth of the Self. She stops remembering that she is Love thus the true Source for her happiness. She then seeks for this Love outside through relationships. Her personal journey offers a Kaledioscope of teachers along the way to illuminate her steps especially the travailing ones. The human path is a dualistic journey, because of which, the Holy Diamond Star light is experienced as a projection back to us reflecting our own inner brilliance. There is more to life than this current realities presentation. This book points to

Mondrian, the Diamond Compositions

The Student

In this fourth installment of the popular university-style series, Quilter's Academy, expert quilters Harriet Hargrave and her daughter Carrie teach you how to make beautiful stars, as well as other more complex blocks, using piecing techniques such as Y-seams and partial seams. Build upon the skills you developed in the first three volumes and fill your creative toolbox with new techniques that allow you to enjoy the process of quiltmaking even more. Work through these senior-year lessons at your own pace and soon you will be making those really stunning quilts that you never thought you could make!

Quilter's Academy Vol. 4 - Senior Year

Major exhibition devoted to Dutch painter Piet Mondrian's classic diamond compositions that helped define the De Stijl movement in twentieth-century Dutch painting. Extensive documentation includes selected bibliography and chronology, 110 pages, with numerous black and white and color plates.

Treasury of Christmas crafts

Amateur astronomers are introduced to the special features of telescopes and are guided in locating celestial objects with the aid of fourteen star maps, photographs, and constellation charts.

The Latter-day Saints' Millennial Star

This book tells two stories. The first and most obvious is why the star known as Sirius has been regarded as an important fixture of the night sky by many civilizations and cultures since the beginnings of history. A second, but related, narrative is the prominent part that Sirius has played in how we came to achieve our current scientific understanding of the nature and fate of the stars. This is the first book to integrate the cultural history of Sirius with modern astrophysics in a way which provides a realistic view of how science progresses over time.
