"This book takes a fond look at one of music's most enduring and most eccentric genres. From their roots in the raucous rhymes 'n' rhythms of Louis Jordan and the inspired lunacy of Spike Jones in the Forties to the musical madness of "Weird Al" Yankovic in the Nineties, novelty songs have always provided a titter, a chuckle, a groan, or a barrel of laughs."

The Golden Age of Novelty Songs

The author's first volume of his Pan-African Chronology covers the period from 1400 through the end of the American Civil War. The second volume chronicles the most significant events in the African diaspora from the end of the Civil War through the pre-World War I years. This book is the third volume in the series. The period it covers is from 1914 through 1929, a time when people of African descent experienced two seminal events: World War I and the Black Awakening. In World War I, people of African descent fought for both sides, earning distinction on the battlefields of France as well as in the jungles and deserts of Africa. The "Black Awakening," a period from 1919 through 1929, marked the dawning of global awareness, not only for persons of African descent but also for non-African peoples, of the contributions of African people to the culture of the world. The book is arranged by year; events of each year are grouped by region-the Americas, Europe, Australia, Asia, and Africa. It also has two special biographical divisions for W.E.B. DuBois and Marcus Garvey.

Hitting the Lottery Jackpot

The Untouchables television series was produced at the high point of the US film series drama in the early 1960s. The series featured the crusade of Federal agent Eliot Ness (played by Robert Stack) against the Prohibition era underworld of "Scarface" Al Capone. The long-running series featured early roles from a variety of screen personalities (such as Leslie Nielsen, Peter Falk, James Coburn, Charles Bronson, Leonard Nimoy, Robert Redford, and Robert Duvall) as well as established Hollywood players (Lee van Cleef, Lee Marvin, Patricia Neal, Barbara Stanwyck, and Dorothy Malone). The show set new standards for TV action and pioneered a more adventurous approach to

the representation of violence on TV, which in turn provoked considerable controversy as well as acclaim. Tise Vahimagi details in this text the development of the "Gangster" genre and "The Untouchables" relations to American cinema and television of the 1950s and 1960s, offering a sidelight onto the social and political event of the period. This book also includes illustrations and detailed credits providing a full production history for followers of the series.

The Coaching Clinic

"Hitting The Mark" is a special type of sales book that comes along even now and then to make a real impact on professional selling. Years in the making and fully field tested, the concepts in this book are solid and require no extra refinement or tweaking. As a general contractor, trade contractor, remodeler, renovator, home builder, carpenter, handyman, occupational therapist, physical therapist, interior designer, architect, durable medical equipment contractor, or anyone else who designs and sells solutions for general remodeling for homes or businesses, decorating updates, or aging-in-place treatments, you will get results as soon as you open the book and begin putting these concepts into practice. Whether you maintain an office or showroom where people come to you to see examples of products and discuss what you can do with them, or you go to them in their home or office to discuss their needs and propose solutions, you need a system of sorting through all of the people you meet and talk with (regardless of how that contact is originated) to identify the most interested ones and determine where to devote your time and focus. Without an objective, definitive way of rating all of these sales leads that you accumulate as you operate your business, and a way of determining who to spend your time with, it's easy to waste your energy on people who have very little or no interest in actually making a purchasing decision. At the other end of the spectrum is ignoring people who really are good candidates for making a decision because the chemistry wasn't there and you didn't connect with them or find any common ground. That's where this book becomes invaluable. It is based on the "ready, willing, and able" formula that most salespeople and small business owners are familiar with, but it adds a very important missing ingredient that turns this into the perfect rating system. For the first time, the three main criteria in evaluating someone's level of interest and ability to make a decision - "ready," "willing," and "able" - have been quantified and defined as objective criteria that will mean the same regardless of who uses them. Then the missing ingredient of how well someone likes you and your approach to their issues - and wants to do business with you - is added so that you can focus your time and energy where you have the highest probability of making a sale. This book lays out a system that takes all of the guesswork out of rating a customer according to their level of interest, ability to make a decision, and likelihood of doing business with you. No more subjectivity and shades of gray. Now a set of totally objective criteria can be applied, and you'll know instantly how likely someone is to make a decision to use your services or expertise to help them achieve the safety, comfort, convenience, security, accessibility, and peace-of-mind they are seeking in a renovation. The 8 chapters are: 1 - Why You Need A Rating System, 2 - The "Ready, Willing, And Able" Test, 3 - An "A" Rating Isn't Sufficient, 4 - Going Behind The Mark, 5 - Only A Few Can Be An "A-1," 6 - Don't Discount The "D"s, 7 - Marking Outside The Lines, and 8 - Getting The Most From Your Customers & Sales Leads. This is the last rating system you will ever need.

Don Mattingly's Hitting Is Simple

For undergraduate and Special Education or General Education graduate courses in Special Education, Behavior Management and Classroom Management, or Applied Behavior Analysis. Behavior Management: Applications for Teachers, Fifth Edition, provides a comprehensive and theoretical overview of behavior management and classroom management that includes introduction, definitions, assessment (functional and formal), strategies, numerous applications, field-based examples, and real-life case studies. The focus of the strategies presented in this text is on positive behavioral support and the prevention of challenging behavior within the classroom setting. Particular attention is paid to special populations, such as young children, teens, and students from diverse backgrounds. The text is packed with classroom connection vignettes, follow-up discussion questions per classroom connection, practical applications and examples so that the content is clear to the reader and easily applied to the classroom. The author clearly examines appropriate implementation strategies to use in a variety of settings--from classroom and recreational venues, to day care centers and in the home. often-ignored issues encountered by classroom teachers on a daily basis: diversity, assessment, legal challenges, and specific age-related concerns. Recognizing that the most-effective behavior management strategy is teaching and reinforcing appropriate behavior, this applications-targeted text again provides a thorough treatment of both the technical and the functional aspects of behavior analysis.

Weybrew has developed the ABC model of stress upon a foundation of nearly three decades of stress research with nuclear submariners. With its connotation as a fundamental or elementary principle of stress dynamics, the ABC model is built upon three basic concepts in learning and vector psychology: Antecedent conditions, Behavior, and Consequences. One of the central features of Weybrew's research is the inclusion of preventive and therapeutic strategies for acute and chronic patterns of stress reactivity. These intervention techniques provided here have heuristic value for the researcher and teacher alike, while being described in language readily understood by the lay reader.

TESTIMONIALS "The ABC's to Hitting .303 is next level! It does a phenomenal job of teaching the mechanical side of hitting but also puts a major focus on vision, timing, and the mental game. Using stories from one of the best to ever do it, Al Oliver, makes the journey of becoming a better offensive player so relatable. This book will definitely help you become a better hitter!" -Brian Harrison, head baseball coach Baldwin Wallace University "A very descriptive all encompassing book that breaks down hitting into its simplest terms. It makes a very complex endeavor seem simple. Al's thoughts push it over the top and proves that confidence and self-belief go a long way in determining your success as a hitter." -Ted Tom, assistant baseball coach University of Central Florida "The ABC's to Hitting .303 is a book tailored to amateur and professional hitters alike. It's extraordinarily simplistic yet loaded with vital information to help you hone your craft." -Bill Gernon, head baseball coach Western Michigan University "I highly recommend The ABC's to Hitting .303. Rock Movers & Shakers

When thirteen machine shop workers from Ohio won a \$295.7 million lotto jackpot, the largest ever, it made headlines. But the real story is that the lottery is a losing proposition for the vast majority who play it. Hitting the Lottery Jackpot provides the hard truth to the questions everybody asks: What are my chances of winning? Doesn't the money go to education? Isn't it harmless? This concise book explains who really profits from lotteries-advertising agencies, TV stations, and ticket vendors-and that shows only about half the money wagered is returned as prizes, the rest pocketed by state governments. Hitting the Lottery Jackpot also demonstrates who loses: lower-income groups and people of color, who spend a much higher percentage of their income on lotteries than others. David Nibert connects the rise of lotteries, illegal in every state before the 1960s, to the economic stagnation beginning in the 1970s, when budgetary crises prompted legislatures to seek new revenues. Difficult economic times produced uncertainty and anxiety for the working class, leading many poor and middle-income people, yearning for security, to throw away huge sums on lotteries they stand almost no chance of winning. Finally, Nibert explores the ideological dimensions of the lottery-the get-rich-quick individualism that they promote among the very groups who would be better served by political action and solidarity. Hitting the Lottery Jackpot is a powerful case for seeing lotteries as a pernicious government tax on the poor,

seductively disguised as fun.

Many of the great ballplayers of the Negro League have been forgotten simply because baseballs Hall of Fame would not recognize black players until Jackie Robinson and Satchel Paige made their way into the Hall of Fame. For this book, more than 50 former Negro League players and baseball historians were asked to vote for players who they believe should have been included in the Hall of Fame, and to select an All-Time Negro League All-Star Team. In addition to presenting and discussing their choices, the book profiles the lives and careers of the players selected. Appendices include rosters of the players and historians who voted.
