Christmas BIG ACTIVITY Book For Kids Single Sided 200 Pages Book

The perfect antidote for rainy-day sulks and backseat boredom. Your kids are buzzing bundles of energy, ever eager for new experiences and new challenges. And one of your toughest jobs as a parent is finding ways to channel kids' energies that promote healthy development while keeping them entertained. Good news, your job just got a little easier. Great for car trips, rainy days, and even power outages, the Great Big Book of Children's Games is a treasury of games and activities for all occasions, every setting and every mood. There are games that stimulate young minds and those that promote physical development. You'll find skill-building games and games designed to sharpen individual faculties. And to help you do your part to keep our highways safe (and your sanity intact), there's an entire section devoted to games to be played while on the road.

The Big Black and White Activity Book

For parents, the summer can seem to stretch out endlessly. There's a constant pressure to keep the children physically occupied and mentally engaged. This can be especially hard if you're a working parent who doesn't get a long time off work. This book should alleviate some of the pressure. Based on many years experience of keeping children busy and happy, Anne and Peter Thomas have compiled a huge collection of summer activities that will help keep boredom at bay. It includes indoor and outdoor activities, things to make, things to see and things to do. It is packed with handy tips on food (such as sweets for car journeys), health (such as sunburn) and safety. It covers everything from simple games that parents might themselves have played as a child to inspiring projects that will challenge the whole family. Fully illustrated in colour throughout, this is an indispensable handbook for any parent.

The Big Ohio Activity Book!

Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The "private school imperative" means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive

Online PDF The Big Activity Book For Anxious People

familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com
