Never Die Alone

The author that brought black literature to the streets is back. Weaving stories of deceit, sex, humor and race Iceberg Slim, best-selling author of Pimp, brings us the story of a hustler who doesn't just play the con game, he transforms it. This is the gritty truth, the life of a hustler in south side Chicago where the only characters are those who con and those who get conned. Trick Baby tells the story of "White Folks," a blue-eyed, light-haired, con-artist whose pale skin allows him to pass in the streets as a white man. Folks is tormented early in life, rejected by other children and branded a "Trick Baby," the child conceived between a hooker and her trick.

Refusing to abandon his life in the ghetto and a chance at revenge, Folks is taken under the wing of an older mentor, Blue. What happens next is not to be believed. Only Slim could bring us the story of a hustler, forced to learn the game and rise to the top. It's Slim's story and he tells it in the only way he knows how, in the language of the streets.

The Black Book of Secrets

A graphic novel memoir from Frank "Big Black" Smith, a prisoner at Attica State Prison in 1971, whose rebellion against the injustices of the prison system remains one of the bloodiest civil rights confrontations in American history. **FOUR DAYS IN 1971 CHANGED THE COURSE OF AMERICAN HISTORY. THIS IS THE TRUE STORY FROM THE MAN AT THE CENTER OF IT ALL.** In the summer of 1971, the New York's Attica State Prison is a symbol of everything broken in America — abused prisoners, rampant racism and a blind eye turned towards the injustices perpetrated on the powerless. But when the guards at Attica overreact to a minor incident, the prisoners decide they've had enough — and revolt against their jailers, taking them hostage and making demands for humane conditions. Frank "Big Black" Smith finds himself at the center of this uprising, struggling to protect hostages, prisoners and negotiators alike. But when the only avenue for justice seems to be negotiating with ambitious Governor Nelson Rockefeller, Big Black soon discovers there may be no hope in finding a peaceful resolution for the prisoners in Attica. Written by Jared Reinmuth and Frank "Big Black" Smith himself, adapted and

illustrated by Ameziane, *Big Black: Stand At Attica* is an unflinching look at the price of standing up to injustice in what remains one of the bloodiest civil rights confrontations in American history.

BLACK BOOK

The "Big Black Book of Electronic Surveillance" opens the door to the world of intelligence arms merchants whose work shapes advanced government surveillance. These companies hail from Austria, Australia, Canada, China, the Czech Republic, Denmark, Dubai, France, Germany, India, Israel, Italy, Japan, Korea, The Netherlands, Singapore, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Ukraine, the United Arab Emirates, the United Kingdom, the United States and many other nations. This volume presents the market leaders and the surveillance solutions and services they provide to governments: packet monitoring, analytics, offensive cyber, mobile location and forensics, lawful intercept, social media intelligence (SOCMINT), facial recognition, voice biometrics and other forms of open source intelligence (OSINT), plus relevant forms of artificial intelligence that automate performance. Also included: military-focused technologies that deliver or intercept intelligence at the tactical edge, such as forward-looking infrared (FLIR), RF monitoring, Electro-Optical/Infrared, eLoran, and systems with the power to take control of critical infrastructure. "The Big Black Book of Electronic Surveillance" is

at once a textbook, a manual for government agencies charged with safeguarding national security, and an encyclopedia on this vital industry. Surveillance is a business. Among the largest players are IT and communications industry giants that quietly develop and profit from surveillance solutions. Laws that authorize and govern their work are quite similar from one country to the next.

Democratic nations such as the USA, UK, France, Germany, Italy and The Netherlands are little more constrained in deploying surveillance solutions than are Russia, China, Iran, North Korea and other authoritarian regimes. For the most part, government agencies are not technology innovators, but rather, end-users of solutions developed and deployed by Intelligence Systems Support (ISS) vendors. The power that governments exercise via current modes of electronic surveillance will be dwarfed by what comes next: advances in artificial intelligence and quantum computing that take surveillance to the next level.
