## Bible Myths, and Their Parallels in Other Religions

Claude Levi-Strauss's mid-twentieth-century work in structural anthropology revolutionized the study of myth, kinship, and totemism, with lasting effects in cultural studies generally and especially in religious studies. This book provides an introduction to this revolution through generous excerpts of some of Levi-Strauss's most important writing on religion. Reactions and responses, both positive and negative, to the revolution are also included, along with some of Levi-Strauss's replies to his critics. A general introduction by volume editor Hans Penner provides a framework for understanding the historical development and contemporary meaning of structuralism for religious studies. This volume provides an unparalleled resource for teaching about structuralism. "

Myth, Locality, and Identity argues that Pindar engages in a striking, innovative style of mythmaking that represents and shapes Sicilian identities in his epinician odes for Sicilian victors in the fifth century BCE. While Sicily has been thought to be lacking in local traditions for Pindar to celebrate, Lewis argues that the Sicilian odes offer examples of the formation of local traditions: the monster Typho whom Zeus defeated to become king of the gods, for example, now lives beneath Mt. Aitna; Persephone receives the island of Sicily as a gift from Zeus; and the Peloponnesian river Alpheos travels to Syracuse in pursuit of the local spring nymph Arethusa. By weaving regional and Panhellenic myth into the local landscape, as the book shows, Pindar infuses physical places with meaning and thereby contextualizes people, cities, and their rulers within a wider Greek framework. During this time period, Greek Sicily experienced a unique set of political circumstances: the inhabitants were continuously being displaced, cities were founded and resettled, and political leaders rose and fell from power in rapid succession. This book offers the first sustained analysis of myth in Pindar's odes for Sicilian victors across the island that accounts for their shared context. The nodes of myth and place that Pindar fuses in this poetry reinforce and develop a sense of place and community for citizens locally; at the same time, they raise the profile of physical sites and the cities attached to them for larger audiences across the Greek world. In addition to providing new readings of Pindaric odes and offering a model for the formation of Sicilian identities in the first half of the fifth century, the book contributes new insights into current debates on the relationship between myth and place in classical literature.

### **In Search of Myths & Heroes**

In this volume, Ian Watt examines the myths of Faust, Don Quixote, Don Juan and Robinson Crusoe, as the distinctive products of modern society. He traces the way the original versions of Faust, Don Quixote and Don Juan - all written within a forty-year period during the Counter Reformation - presented unflattering portrayals of the three figures, while the Romantic period two centuries later recreated them as admirable and even heroic. The twentieth century retained their prestige as mythical figures, but with a new note of criticism. Robinson Crusoe came much later than the other three, but his fate can be seen as representative of the new religious, economic and social attitudes which succeeded the Counter-Reformation. The four figures help to reveal problems of individualism in the modern period: solitude, narcissism, and the claims of the self versus the claims of society. They all pursue their own view of what they should be, raising strong questions about their heroes' character and the societies whose ideals they reflect.

### **A Journey In Southern Siberia: The Mongols, Their Religion and Their Myths**

Creation myths are the deepest and most important of all myths because they are concerned with both the basic patterns of existence and the ultimate meaning of life. In this book, an eminent Jungian analyst examines the recurring motifs that appear in creation myths from around the world and shows what they teach us about the mysteries of creativity, the cycles of renewal in human life, and the birth of consciousness in the individual psyche. Among the topics discussed are: and and and andbull;and Why the creative process is often accompanied by anxiety, depression, loneliness, and fear of the unknown. and and and andbull;and The meaning of creation motifs such as the egg, the seed, the primordial being, the creative fire, the separation of heaven and earth, and the four stages of creation. and and and andbull;and Creation symbolism in the alchemical opus of medieval tradition. and and and andbull;and How creation-myth motifs appear in the dreams of people who are on the verge of a leap forward in consciousness.

THE Buriats whose myth-tales I have collected, and whose beliefs, modes of worship, and customs I have studied at their source and describe in this volume, are Mongols in the strictest sense of the word as men use it. They inhabit three sides of Lake Baikal, as well as Olkhon its only island. The place and the people are noteworthy. Lake Baikal is the largest body of fresh water in the Old World, being over four hundred miles long and from twenty-four to fifty-six miles broad, its total area covering about thirteen thousand square miles. The Buriats living west of that water, and those inhabiting the sacred island of Olkhon, are the only Mongols who have preserved their own race religion with its primitive usages, archaic beliefs, and philosophy, hence they are a people of great interest to science. The region about that immense body of water, Lake Baikal, is of still greater interest in history, for from the mountain land south of the lake, and touching it, came Temudjin, known later as JIngghis Khan, and Tamerlane, or Timur Lenk (the Iron Limper), the two greatest personages in the Mongol division of mankind. From the first of these two mighty man-slayers were descended the Mongol subduers of China and Russia. Among JIngghis Khan's many

grandsons were Kublai Khan, the subjector of China, together with Burma and other lands east of India; Hulagu, who destroyed the Assassin Commonwealth of Persia, stormed Bagdad, and extinguished the Abbasid Kalifat; and Batu, who covered Russia with blood and ashes, mined Hungary, hunting its king to an island in the Adriatic, crushed German and other forces opposed to the Mongols at Liegnitz, and returned to the Volga region, where he established his chief headquarters. Descendants of Jhingis Khan ruled in Russia for two centuries and almost five decades. In China they wielded power only sixty-eight years. From Tamerlane, a more brilliant, if not a greater, leader than Jhingis, descended the Mongols of India, whose history is remarkable both in the rise and the fall of the empire which they founded. These two Mongol conquerors had a common ancestor in Jhingis Khan's great-great-grandfather, Tumbinai; hence both men were of the same blood and had the same land of origin,—the region south of Lake Baikal. That Mongol power which began its career near Baikal covered all Asia, or most of it, and a large part of Europe, and lasted till destroyed by Russia and England. The histories of these struggles are world-wide in their meaning; they deserve the closest study, and in time will surely receive it. When the descendants of Jhingis Khan had lost China, the only great conquest left them was Russia, and there, after a rule of two hundred and forty-four years, power was snatched from them. The Grand Moguls, those masters of India, the descendants of Tamerlane, met with Great Britain, and were stripped of their empire in consequence.

### **The Global Myths**

The first purpose of this volume is to make representative writings from the most eminent structuralist thinkers easily

available. They represent a variety of fields and have, in a sense, pioneered a new approach; they are consequently interdisciplinary sources of valuable insights. The second purpose is to help place structuralism in a historical perspective. Marx, Freud, and Saussure are frequently ignored as precursors of present-day structuralism, and yet they developed many of the techniques used and elaborated upon by present scholars.

### **Anthropological Theory**

This collection of thirty-four major essays devoted to the theories, methods, and problems of myth criticism offers a convenient and substantial introduction to one of the most distinctive trends in contemporary literary study. The essays (many of them previously uncollected) are arranged to lead from general considerations to analyses of specific authors. The four Part I selections constitute an informal survey of the views of myth and ritual taken by disciplines other than literature. In Part II the first six essays relate the concept of myth and ritual to general literary theory, while the final three evaluate the uses of myth in critical theory and practice. The twenty-one Part III essays, which apply myth criticism to individual literary works or authors, afford a representative sampling of the mythopoeic patterns discerned in literature from Homer to Faulkner. Among the contributors are: David Bidney, Gösta Røheim, Joseph Campbell, Clyde Kluckhohn, Stanley Hyman, Philip Wheelwright, Richard Chase, Harold Watts, Northrop Frye, Andrew Lytle, Philip Rahv, Francis Fergusson, Marvin Magalaner, John Lydenberg, and Harry Slochower.

What are man's earliest ideas of a soul and a God, and of his own origin and destiny? Why do we find certain myths, such as of a creation, a flood, an after-world; certain symbols, as the bird, the serpent, the cross; certain numbers, as the three, the four, the seven—intimately associated with these ideas by every race? What are the laws of growth of natural religions? How do they acquire such an influence, and is this influence for good or evil? Such are some of the universally interesting questions which the author attempts to solve by an analysis of the simple faiths of a savage race. Contents: Chapter I. General Considerations On The Red Race. Chapter II. The Idea Of God. Chapter III. The Sacred Number, Its Origin And Applications. Chapter IV. The Symbols Of The Bird And The Serpent. Chapter V. The Myths Of Water, Fire, And The Thunder-Storm. Chapter VI. The Supreme Gods Of The Red Race. Chapter VII. The Myths Of The Creation, The Deluge,

The Epochs Of Nature, And The Last Day. Chapter VIII. The Origin Of Man. Chapter IX. The Soul And Its Destiny. Chapter X. The Native Priesthood. Chapter XI. The Influence Of The Native Religions On The Moral And Social Life Of The Race.

Dr. Peet is well known as a writer on American antiquities. He has gathered together from a great variety of sources much interesting and impressive material in regard to the religions of the aboriginal inhabitants of our country. It will be a surprise to the average reader as he peruses these interesting pages to see how elaborate was the religious belief and worship of the untutored races that preceded the era of civilization in America. There is much material in the book upon which to base theories as to the origin of the aboriginal inhabitants of the continent. There is poetic and romantic suggestion in abundance. The student of ethnology or of natural history or of theology and even the merely curious reader will find the book one of great interest. We can but admire the learning of the author, and his diligence in research. Contents: Introduction. Chapter I. Races And Religions In America. Chapter II. Totemism And Mythology. Chapter III. As much a monolith as a man by the end of his life, Sir John Gielgud was, from the beginning of his career in the 1920s, an active, energetic workaholic. By turns actor, director, and producer, he was always proceeding to the next project before he had finished its predecessor. By the time of his death, he had appeared in hundreds of plays, hundreds of

movies, and countless television programs. His voice and face were instantly identifiable, and there was something reassuring about his gentle, intensely civilized, slightly abstracted demeanor. Such a major force in British and American theater deserves a similarly imposing biography, and he receives one in Croall's exactingly researched work, based on full access to Gielgud's papers, letters, and books--and showing it. Witty and well-written as well as well-researched, Croall's fine and complete portrait of the man and his endearing charm often reads more like a novel than like nonfiction.
