On the heels of her mother's death, Hope Logan reluctantly returned to her grandparents' home place in search of a journal that revealed explosive crimes and atrocities of the past that had haunted her grandma for nearly sixty-five years. Bitterness, unforgiveness, and anger consumed her as she set out to solve

the mystery that surrounded her grandma's life. The dark evil secret that was contained in the journal only deepened her resentment of God. Because of her quest, she came in contact with many strong believers, especially a handsome young pastor and three senior citizens. In that small town in the foothills of the mountains of North Carolina, Hope's bitterness, unforgiveness, and anger slowly began to fade in the light of the strong faith of the young pastor and three senior citizens. She discovered the true meaning of faith and hope in Christ in the midst of adversity. Carolyn Digh Griffin, a native North Carolinian, resides in Waxhaw, North Carolina, with her husband, Hoyle. She is retired from Union County Public Schools where she was an Administrative Assistant to the Assistant Superintendent. She has two daughters and four grandchildren who also reside in the Old North State.

If you have ever wondered, "How and when did we first know that atoms contain 'sub-atomic' particles?", you will enjoy reading this book. Who first discovered that atoms are not the smallest bits in the world? We do not mean: Who first guessed these things? The guesses took place in ancient times, during BCE days (Before the Common Era). We are asking, "Are the answers to such questions really available in easily readable form?" A person who asks, "Where can I find such answers?", is a good candidate to read this work. Read this and learn who first conceived of light being in particle form. As a consequence, now we can be certain that light behaves at times as waves, and at other times as particles. That person's ideas fostered the relatively new branch of physics known as Quantum Mechanics. Even though Albert Einstein used the idea that light acts like a particle sometimes in order to work out his theory of photoelectricity, he never could bring himself to believe wholeheartedly in some of the postulates and implications of Quantum Mechanics. He could never accept that the details of a two-particle problem always resorted to statistics to describe what actually happened. Albert E. always felt that, in nature, one could invariably calculate all the details of interactions in a direct fashion. As Dr. Einstein said, "God does not play dice with the universe." However, QM disagrees with Einstein here, and with other specifics as well. The second major part of this writing pertains to light, and some of its wonders. In our world of ancient history, even in the pre-scientific days, many declared that light crossed distances in an instant - that is, at truly infinite speed. No one had any idea how to find out if that declaration were true. Not until, that is, in the 1600s, when a little known Dutchman devised a way to measure light's speed - at least the light that traveled from Jupiter's moon Io to Earth. This book tells all about this landmark observation, as well as many others pertaining to light and its speed. One of the landmark experiments of all time must be the one which gave us the amount of charge on an electron. It also pointed out that all electrons have precisely the same amount of charge. Here, we read about the design and the execution of this experiment. Knowing this charge, it was relatively easy to next determine how much an electron weighs. This was done by building mass spectrometers - a huge field which is

touched upon in these pages. It is not necessary to know anything about physics, or mathematics, in order to be able to understand the subject matter. In places, some math relationships are given to help the reader see how relatively simple the math is. But the reader may skip the math entirely without losing the meaning of the discussion. A word about the author Bill Grubbs began his professional life as an electrical engineer. By his mid-twenties, he realized just how abysmally ignorant he truly was. He knew little about fundamentals of the natural world. To help himself to partially overcome this problem, he began a study of physics in earnest. When he had earned his MS in Solid State Physics, he turned to going the next step: to earn a Ph.D. Soon, he concluded that the doctorate would likely not result in expanding his understanding of worldly things - his goal - so he quit his formal studies, and simply increased his knowledge in those areas that piqued his curiosity. He still gets a thrill from running into a thing beyond his understanding, then learning whatever is needed to gain the desired level of understanding of that phenomenon. A good part of this writing is aimed at people who have a wish to 'understand what makes the various parts of the world tick', and 'how do we know it?'

It's the result of making the right choices and choosing the right attitudes. And becoming wealthier has never been easier for people of all backgrounds, ages and experience. The author has been privileged to spend countless hours in the company of some truly exceptional individuals, self-made billionaires whose knowledge and experience formed the basis of this practical guide book on the principles of becoming wealthier. Some of these extraordinary people shared their insights and methods by personally mentoring the author. Some became the author's personal clients. Each of them was uniquely different yet shared common principles on how to become more successful, wealthier and financially fulfilled. You certainly don't need to aspire to reach the dizzying heights of becoming a billionaire or even a multi-millionaire to enjoy a better life, a life with more freedom, more choice and a powerful sense of self-fulfilment. Ultimately the book aims to stimulate the latent entrepreneur within all of us, to wake up that dormant freedom-loving individual who's just waiting to break free from the old and limiting ways of earning money. ## **Last Light; Night Light**

This book Beyond Four Borders is about marriage challenges of the South African citizens who are married to Africans from Africa. The damage of the division of Africa a long time ago still is felt today. The different languages, cultures, perceptions, and stereotypes. Some South African mothers even go to the extent of cursing their daughters married to Africans from Africa. Some African mothers from Africa also don't approve South African ladies. We need to address this in order to allow our children to marry those they love. In this book I'm focusing on those who are struggling in marriages. These are usually the middle class and the lower class people. The rich don't experience these challenges. God gave me the title Beyond Four Borders based on that my

husband Katalay was beyond four boarders when I wrote this book. Katalay comes from Democratic Republic of Congo, when traveling by road, he goes through Zambia (2 boarders), Zimbabwe (2 boarders) then enter South African boarder. L'amour and I suffered hardship when Katalay was in Congo for over four years. The lies, gossiping, humiliation at home, in the community and some churches. The false beliefs that "foreign nationals marry South African women for identity document and to get resources. That African men from Africa come to South Africa already married and marry South African women as second wives. Denying African men from visiting their parents and siblings accusing them of visiting their wives and children. Now also added is falsely accusing foreign nationals of being human traffickers without any proof." Children of South Africans and African parents hide their identities at school for fear of discrimination. My daughter L'amour is asked by her classmates what nationality she is. They don't understand why her name is L'amour and not an African name. Some women and children why L'amour is taller than her classmates. There are children from various African countries who hide their identities because the moment it is known they are called derogative names. One day I took L'amour at a public park, I heard some kids between 7 - 10 years old telling a young Zimbabwean boy to go to his country and stop using a South African swing. The boy just kept quiet and kept playing. I did watch to make sure the boy was not beaten by his bullies. As individuals we have to make sure we promote loving our fellow human beings in spite of where they come from. There are people who think I'm from Africa and not a South African. That does not bother me. This happened even before the democracy of South Africa. I remember applying for an identity document, I spent two years going to Home Affairs Department, every Mondays, Wednesdays and Fridays after school to apply for my identify document. Home Affairs told me to go to Zimbabwe or Mozambique to bring my father. What a humiliation it was. This book is also based on my personal challenges being married to a Congolese and of others I have met with similar problems. My domineering and controlling mother and relatives rejecting my husband. My husband's domineering and controlling mother who rejected me. Katalay's mother and sister calling me a foreigner, on the other hand my mother, siblings and some relatives calling Katalay a foreigner. These inflictions of pain went on for over 10 years of our marriage. When they failed on talking they resorted to witchcraft. It is unfair that parents choose for their children who to marry. To claim to care and protect their children. The phenomenon of choosing marriage partners by parents for their children is an unfair practice. Such parents usually have their interest in heart and not that of their children. Some of these children after agreeing to the arranged marriage they turn to drugs and alcohol to deal with the pressure. Some even abuse their spouses.

### **Last Light**

Growing up with a Colombian father for whom magical realism was a way of life made ordinary reality feel like an immigrant experience for author Jose Chaves, who was born in the U.S. but, as his father would insist, made in Colombia!" That experience comes alive like a movie on the page in *The Contract of Love*, a memoir about family that is both hilarious and heartbreaking. Chaves' straightforward style turns the familiar exotic and makes the unfamiliar feel like home as he takes readers on a cultural journey from small-town, muscle-car America to the Chaves family farm in Colombia, where the cow is named Lyndon Johnson, and an emotional journey from his father's volatile world where unrequited love is sung out loud in restaurants, to a fraternity where the most important rule is to never reveal your feelings to another guy in public. With tenderness, humor, and hypnotic clarity, Chaves explores the landscape of love that holds us together, beyond the addictions that bind us-- from the broken faith that sends a boy spiraling down, to the grace that finds the man.
