Ultimate Bodypedia

The creators of the award-winning Flight of the Honey Bee team up again for a look at a remarkable lizard: the gecko. Meet the gecko, the escape artist of the lizard world. Hawks, rats, and snakes would love to catch one for their dinner, but the gecko's amazing ability to protect itself and outsmart predators keeps it safe from day to day. The gecko is more than a match for its pursuers, using clever camouflage and dropping its tail as a decoy to evade them. And even beyond its escape abilities, the gecko is fascinating, with feet covered in tiny hairs for gripping (even upside down!) and eyes that it cleans with its tongue. This wonderful introduction to one of the coolest lizards on the planet will captivate amateur scientists.

This activity book is jam-packed with the coolest reptiles and amphibians kids love - from frogs to turtles to alligators to lizards. Loaded with color and fun, it includes mazes, spelling and pattern games, drawing activities, more than 1,000 stickers, and more.

What Reptile?

An illustrated look at the weird and wonderful creatures that live in the very deepest parts of the sea. Humans have always wondered, with a mixture of fear and

Free Reading Ultimate Reptileopedia The Most Complete Reptile Reference Ever

fascination, what lurks beneath the surface in the depths of the ocean. In this book, Erich Hoyt introduces 50 of the oddest creatures you will ever meet in the sea. From the carnivorous comb jelly to the lantern-carrying deep-sea dragonfish, from a vampire squid with giant eyes to dancing jellyfish, Hoyt explores these peculiar conditions and their equally peculiar environment. These creatures have adapted to lack of light and, using sound pulses (echolocation) or light-producing organs and pigment cells (emitting light via bioluminescence), they are able to communicate without giving their location away to predators. These stunning, captivating photographs weren't taken from the portholes of submarines. Photographers David Shale, Solvin Zanki and Jeff Rotman worked with oceanography institutes, museums and the BBC Natural History Unit, taking long cruises across the ocean to record and try to understand these little-studied residents of the deep sea. To capture the creatures for observation, a net was lowered far beneath the surface. As soon as the trawl was hauled aboard, the photographers would race to transfer the most unusual animals to fresh seawater aquariums in a chilled laboratory on board. These pages let readers gaze into strange, wild eyes and study faces with toothless or crooked smiles that witness the fruits of deep-sea evolution. Informative captions explain what the patterns of lights on their bodies are "saying" to others in

Free Reading Ultimate Reptileopedia The Most Complete Reptile Reference Ever

their absolutely dark world. The wonder and extraordinary weirdness of what lives in the deep seas, so far away from us and yet so close, will become more familiar with this book.

Wonderful World of Dinosaurs

Wildlife expert Coyote Peterson brings his 12.5 million YouTube subscribers and legions of kid fans a highly designed, full-color exploration of his "Sting Zone" adventure series, culminating in his thrilling encounter with the "King of Sting"--the Executioner Wasp. Coyote Peterson, YouTube star, animal enthusiast, and creator of the Brave Adventure series, has tracked down some of the world's most painfully stinging insects and chronicled getting stung by each of them on his YouTube channel. Coyote has saved the best--or possibly the worst--for last, and he's finally ready to share his experience with the most painful sting in the world: the Executioner Wasp. Featuring full-color stills from his show, and packed with facts about nature's most misunderstood creatures, King of Sting is a dream book for any kid that loves animals, bugs, outdoor exploration, and danger!
