Tracing Your Ancestors from 1066 to 1837

Armagh the smallest county in Northern Ireland, has a rich, colourful and even tempestuous history. War, famine and emigration over the last four centuries have all contributed to forming the distinctive character of its people. The constant struggle between Planter and Gael that has characterised the county since the Plantation in the early 17th century may be seen in, for example, the almost equal division of the most popular surnames. The county town, the city of Armagh, is the ecclesiastical capital of both the Catholic and Protestant religions on the island. By the end of the 18th century the county became one of the most prosperous and the most densely populated in Ireland. Its turbulent history has taken its toll on the evidence that remains. Many records were lost, including those in the destruction of the Public Record Office in Dublin in 1922; much has, however, survived to aid the dedicated family or local historian and is accessible in the detailed catalogues and user-friendly searching aids in the Public Record Office of Northern Ireland. Ian Maxwell writes both as an historian and an archivist eager to encourage researchers to use the fullest range of sources available. An exceptional feature of this book are the reference appendices. These include a breakdown of administrative divisions listing some 1,400 townlands and also unofficial placenames which disappeared from official use after the standardisation of placenames in the 1830s. Also provided for each townland

are the civil parish, barony and poor law union plus the vital district electoral division details that greatly facilitates the researcher using sources such as census returns and property valuation records. Other appendices provide crucial archival references to tithe and valuation records and civil and Catholic parish maps are included. Such reference appendices will be a feature of further books in this series of county guides for the family and local historian.

"Within every home is a treasure trove of information. Unfortunately, many irreplaceable documents that help tell individual stories, and the stories of our communities, are deteriorating among our personal belongings." Written for individuals who hope to protect family history, this book provides everything an unofficial archivist needs to ensure materials that connect us with our past are available for future generations. Its goal is to help you create and maintain a valuable family and community resource of recorded information about your world from the unique point of view of you and your loved ones. The Unofficial Family Archivist is organized into eight sections that discuss preservation; creating and identifying materials that represent you; how to properly organize, preserve, and describe these items; how to prepare them to pass on to future generations. Donair, Lindsay Wickstrom explores the history of the donair, and the people who shaped this Halifax-born kebab into the iconic Canadian street food it has become. Donairs were originally not for the lucky-in-love, but the recourse of the degenerate. They were the butt of toilet humour, the scapegoat of indigestion. The mystery meat with the secret sauce was wrapped in urban legend. It was so commonplace that we took it for granted, no more significant than hamburgers or spaghetti. We didn't realize that it was ours. It wasn't until we made westward pilgrimages to Ontario or Alberta for school or work that the donair became a symbol of home. Book of Donair has everything you want to know about donairs--and were going to ask anyway.

In 1882 the Smithsonian Institution Arctic scientist, Lucien McShan Turner, traveled to the Ungava District that encompasses Northern Quebec and Labrador. There he spent 20 months as part of a mission to record meteorological data for an International Polar Year research program. While stationed at the Hudson's Bay Company Trading Post of Fort Chimo in Ungava Bay, now the Inuit community of Kuujjuaq, he soon tired of his primary task and expanded his duties to a study of the natural history and ethnography of the Aboriginal peoples of the region. His ethnography of the Inuit and Innu people was published in 1894, but his substantial writings on natural history never made it to print. Presented here for the first time is the natural history material that Lucien M. Turner wrote on mammals of the Ungava and Labrador regions. His writings provide a glimpse of the habits and types of mammals that roamed Ungava 125 years ago in what was an unknown frontier to non-Inuit and non-Innu people.

In the title poem of award-winning poet Kayla Czaga's sophomore collection, the speaker is suspended between knowledge and experience — hovering there confidently before the world plunges her into the frigid waters of adult life. Czaga reimagines the body as a strange and unknowable landscape, full of cancers that “burst like blackberries;” a butt

that could run for prime minister of Canada; and the Cerberus-like sultry eyes of Winona Ryder's pores. In Dunk Tank, clouds become testicles and uteri turn into goldfish, flickering and fragile, but still ultimately glowing. These are poems of friendship, lingerie, sex, and longing. Not knowing how the world works, Czaga forges a landscape of metaphor and gleaming, dense imagery. Dunk Tank is playful and dark, comic and disturbing.

But how do you go back further, into the centuries before the central registration of births, marriages and deaths was introduced in 1837, before the first detailed census records of 1841? How can you trace a family line back through the early modern period and perhaps into the Middle Ages? Jonathan Oates clearly written new handbook gives you all the background knowledge you need in order to go into this engrossing area of family history research. He starts by describing the administrative, religious and social structures in the medieval and early modern period and shows how these relate to the family historian. Then in a sequence of accessible chapters he describes the variety of sources the researcher can turn to. Church and parish records, the records of the professions and the courts, manorial and property records, tax records, early censuses, lists of loyalty, militia lists, charity records all these can be consulted. He even includes a short guide to the best methods of reading medieval and early modern script. Jonathan Oates handbook is an essential introduction for anyone who is keen to take their family history research back into the more distant past.
