Workbook/Lab Manual to accompany Vis-à-vis: Beginning French

"Deux mondes" is widely regarded as the most communicative text available for beginning French courses. Based on the Natural Approach, developed by Tracy Terrell and Stephen Krashen, "Deux mondes, Fourth Edition" offers beginning language students a way to develop language proficiency, especially in listening and speaking, that allows students to participate in real conversations at a very early stage. The Natural Approach in general, and "Deux mondes, Fourth Edition" in particular, present material inductively (so that the activities drive the grammar) and in the context of culturally rich themes and topics. This text clearly sets itself apart from the competition: with "Deux mondes," students quickly become excited with their rapid growth in comprehension and vocabulary acquisition, and enjoy speaking in the non-threatening environment made possible by the activity formats.

Nachalo

Based on the Natural Approach, Dos mundos stresses the use of engaging activities and interesting readings in a natural and spontaneous classroom atmosphere. In this comprehension-based approach to learning language, the

development of communicative language skills is the central goal, with formal grammar presentation and grammar practice at the service of communication. The text is designed so that class time can be devoted to exposing students to Spanish through creative activities and readings, allowing grammar explanations and exercises to be studied outside the classroom.

The third edition of *Vis-À-vis* continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the "Correspondance" feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson "Correspondance" cultural spread) and in the new "Bienvenue dans le monde francophone" feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety

SALVE!, Second Edition is a complete introductory Italian program that introduces students to Italian life and culture while furthering their skills to understand and express common words and phrases in Italian. Students are exposed to the vibrant life of modern day Italy and its rich cultural heritage through the Sulla Strada video clips which give your students a taste of everyday life in Italy while providing a wealth of activities in both the text and online. The integration of video, suggestions for music, internet and GoogleEarth searches, and a distinctive focus on Italy's varied regions, make this text essential for anyone interested in learning Italian. Students are invited to talk about their education, family, friends, tastes, leisure activities, their past and their plans for the future, and encourages them to make cross-cultural comparisons and connections from their own life with those of their Italian counterparts. Students will also discover the different Italian regions and their distinctive characteristics. SALVE! is a complete, streamlined program that is highly-effective for courses with a two-semester or reduced hour sequence. The text uses a manageable building block method introducing the structures of the language through an easy-to-understand dialogue and narrative, and by recycling essential vocabulary throughout each chapter. As new information is introduced and environmental changes occur, Plant Biology continues to develop and evolve as a science. Updated and revised to keep pace with these developments, the Fifth Edition of Botany: An Introduction to Plant Biology provides a modern and comprehensive overview of the fundamentals of botany while retaining the important focus of natural selection, analysis of botanical phenomena, and diversity. Students are first introduced to topics that should be most familiar (plant structure), proceed to those less familiar (plant physiology and development), and conclude with topics that are likely least familiar to the introductory student (genetics, evolution, and ecology). Mauseth is sure to provide the latest material on molecular biology and plant biotechnology in an effort to keep pace with these advancing areas of study. All sections are written to be self-contained allowing for a flexible presentation of course material. Key Features: - Includes new content on molecular biology, plant biotechnology, and the most recent coverage of taxonomy and phylogeny of plants. - Now available with a new electronic laboratory manual. - Plants Do Things Differently boxes help

Today, many general-education archaeology courses are large, lecture-style class formats that present a challenge to providing students, particularly non-majors, with opportunities to learn experientially. This laboratory-style manual compiles a wide variety of uniquely designed, hands-on classroom activities to acquaint advanced high school and introductory college students to the field of archaeology. Ranging in length from five to thirty minutes, activities created by archaeologists are designed to break up traditional classroom lectures, engage students of all learning styles, and easily integrate into large classes and/or short class periods that do not easily accommodate traditional laboratory work.

language acquisition, it was the first beginning Japanese text to integrate the teaching of all four language skills (reading, writing, listening, speaking) and to be accompanied by a full complement of ancillary materials. Grammar is treated as a tool for developing the ability to communicate in Japanese, not as the focal point of the text. The illustration program (photographs, line drawings, realia) and the two-color, hard-cover format is unique in this field, providing an attractive context for language learning.
